

NATIONAL BANK OF KAZAKHSTAN

Kazakhstan: Balance of Payments and External Debt

for 9 months of 2021

January 2022

This publication was prepared by the Balance of Payments Department. It reflects the latest developments in the external sector of the Republic of Kazakhstan and provides statistical reports on the balance of payments, international investment position and external debt of the country, as well as analytical commentaries to these reports. Statistical reports are supplemented by detailed analytical tables describing the methodology of external sector statistics and data sources for compilation. A separate statistical annex presents the structure of stocks and flows of international investment by type of investment. It is published on quarterly basis (in January, April, July and October) and available in three languages: Kazakh, Russian and English.

Adjustments to previously published historical data series are possible in case of the changes in accounting methodology of statistical data and (or) availability of additional information about foreign trade transactions. In accordance with the regulations, statistics of the external sector of the Republic of Kazakhstan is revised twice a year - during the compilation of reports on the balance of payments, international investment position and external debt for the half year and for the full year and covers the two years prior to the reporting. Updated data are published annually in May and November.

The main source for clarification of data is the emergence of additional information received at the time of compilation of the reports – the data obtained in the framework of registration and notification of foreign currency transactions, the identification of statistical discrepancies in reconciliation of data with others, except for statistical reporting on the balance of payments, data sources, as well as clarification of official trade statistics.

Due to rounding of data in separate cases in the tables provided in this publication, there may be minor differences in the last digit between totals and sum.

The date of compilation of statistical data for this publication is December 30, 2021. The date of the last update of data for the period 2018-2020 is December 30, 2021

Additional information about the presentation of statistical data can be obtained from the Balance of Payments Department:

at the following address: Z05T8F6, Nur-Sultan city, district "Esil", Ave. Mangilik El, building 57A
by phone: (717) 277-55-23 (balance of payment)

(717) 277-55-40 (international investment position and external debt)
by email: meruyert.nursadyk@nationalbank.kz

Statistical reports on the balance of payments, international investment position and gross external debt in standard and analytic representations, as well as a methodological commentary on the compilation of these reports are available on the website of the National Bank of Kazakhstan: <http://www.nationalbank.kz>. The specified statistical reports are published on the NBK's website on the 90th day after the end of the reporting period and are available in Kazakh, Russian and English languages.

BALANCE OF PAYMENTS OF THE REPUBLIC OF KAZAKHSTAN for 9 months of 2021

Current account

Current account for 9 months of 2021 developed a deficit and amounted to 4.1 billion US dollars (hereinafter referred to as \$), for 9 months of 2020, the current account deficit amounted to 5.1 billion dollars (Appendix 2). The negative current account balance is associated with an increase in income payable to direct foreign investors (Figure 1).

The trade balance surplus increased by 73.5% to \$14.9 billion. The increase in the surplus was due to the growth in exports of goods.

The export of goods increased by 20.6% compared to the indicator for 9 months of 2020 and amounted to \$43.2 billion. The value of exports of oil and gas condensate (51.5% of official exports) increased by 19.0% or \$3.6 billion, which is associated with an increase in contract prices by 31.0%. At the same time, world prices for Brent oil on average for 9 months of 2021 amounted to \$67.4 per barrel, having increased by 62.2% compared to 9 months of 2020 (\$41.6 per barrel on average for 9 months of 2020 of the year).

The export of ferrous metals increased by 54.7%, the export of non-ferrous metals - by 33.2%. Export of grain increased by 25.7%.

Imports of goods under the BOP increased by 4.0% and amounted to \$28.3 billion. The increase in imports of goods was due to an increase in imports of consumer non-food products by 26.9% or \$1.3 billion and intermediate goods by 6.5% or \$864.9 million. Imports of investment goods (means of production) decreased by 20.6% or \$1.7 billion.

The deficit in the *balance of international services* decreased by 51.5% to \$1.2 billion compared to the figure for 9 months of 2020. The decrease in the deficit in the balance of services is associated with a decrease in imports of services by 14.0%. Foreign trade turnover in international services decreased by 4.5% and amounted to \$9.6 billion.

Export of services amounted to \$4.2 billion, having increased by \$0.4 billion. The increase in the export of services was mainly due to the growth in the income of domestic transport companies on the pipeline transit of oil and gas through the territory of the republic (38.6 % of the export of services) by 23 .8 %, or by \$311.0 million to \$1.6 billion. Also, the increase in exports of services was affected by the growth in income of Kazakh companies engaged in the transportation of goods of non-residents by road, by 3.9%, or by \$7.5 million and income of residents from construction services by 77.3% or by \$32.3 million. The expenses of

non-residents on trips to Kazakhstan decreased by 1.6% or by \$6.5 million and amounted to \$395.0 million.

Imports of international services amounted to \$5.4 billion, down \$0.9 billion. The decrease in imports of services is due to a decrease in the expenses of residents on other business services (29.9% of imports of services), which are mainly related to the implementation of large infrastructure projects in Kazakhstan, by 44.2 % or \$1.3 billion. The income of non-residents from transportation services also decreased by 11.6% or by \$190.2 million, mainly due to a decrease in revenues in favor of non-residents from services for the transportation of goods by residents by rail. Expenses of Kazakhstaniis on *trips* abroad increased by 87.9% or by \$553.1 million and amounted to \$1.2 billion.

The deficit in the *balance of primary income* increased by 55.4% as compared to the figure for the first 9 months of 2020 and amounted to \$17.4 billion. The increase in the deficit was due to the growth in income of foreign direct investors.

Income of residents from investments compared to 9 months of 2020 increased by 18.7% and amounted to \$1.6 billion. The growth is provided by income of Kazakhstani enterprises from participation in the capital of foreign subsidiaries. Income from the country's official reserves (reserve assets and foreign assets of the National Fund) increased by 4.1% to \$713.4 million which account for about half of the income of residents from investment

Investment income payable to non-residents increased by 54.1% to \$18.3 billion including non-resident income from direct investment increased by 61.7% from \$10.2 billion in 9 months of 2020 to 16, \$5 billion for 9 months of 2021. Of the total investment income payable, 76.3% is income from equity in the form of distributed income (and dividends) or in the form of foreign direct investors' share in the retained earnings (or loss) of Kazakhstani enterprises (so-called reinvestment). Interest payments to non-direct investment creditors increased by 6.7% to \$1.8 billion.

The deficit in the *balance of secondary income* amounted to \$317.2 million (surplus of \$36.4 million for 9 months of 2020). The deficit in the balance of secondary income is due to the operations of individuals on money transfers.

Remittances of individuals (personal transfers) abroad increased by 28.7% and amounted to \$1.1 billion. The increase occurred mainly in transfers to the Russian Federation, Kyrgyzstan, Uzbekistan, Armenia and Turkey. On the contrary, transfers to individuals from abroad decreased by 13.0% to \$238.9 million mainly due to a decrease in receipts from the Russian Federation and the Republic of Korea. At the same time, transfers from the United States increased.

In terms of public sector operations, the increase in revenues to the republican budget of import customs duties from the EAEU states exceeded the increase in Kazakhstan's payments to the budgets of the union states. As a result, the positive balance of transfer operations of government bodies decreased by 3.1% and amounted to \$1.0 billion.

Financial account (excluding operations with reserve assets of the National Bank)

Net inflow on the *financial account* (excluding reserve assets) for 9 month of 2021 amounted to \$6.8 billion (\$9.6 billion for 9 month of 2020). The higher growth of residents' liabilities compared to the growth of their assets was ensured by the net capital inflow or «net borrowing from other countries» in financial transactions.

Table 1

Financial account balance (excluding reserve assets)
("+" - increase in assets/liabilities; "-" - decrease in assets/liabilities)

	<i>millions of US dollars</i>		
	9 months 2019	9 months 2020	9 months 2021
Financial account	2395.8	-9,569.0	-6,752.1
Net acquisition of financial assets	4867.9	-2220.0	5392.9
Direct investments	-2019.1	1195.9	1354.3
Portfolio investments	3088.2	-7936.8	-4703.7
Derivative financial instruments	-29.4	16.2	45.6
Other investments	3828.3	4504.8	8696.6
Net commitment	2472.2	7349.1	12145.0
Direct investments	3667.8	6366.5	6585.1
Portfolio investments	-1252.4	-133.0	281.7
Derivative financial instruments	-661.5	-799.7	2202.1
Other investments	3270.9	304.6	3812.0

In the context of the sectors of the economy of residents, net capital inflow (or net borrowing before other countries) for 9 months of 2021 was provided mainly by government bodies (Table 2).

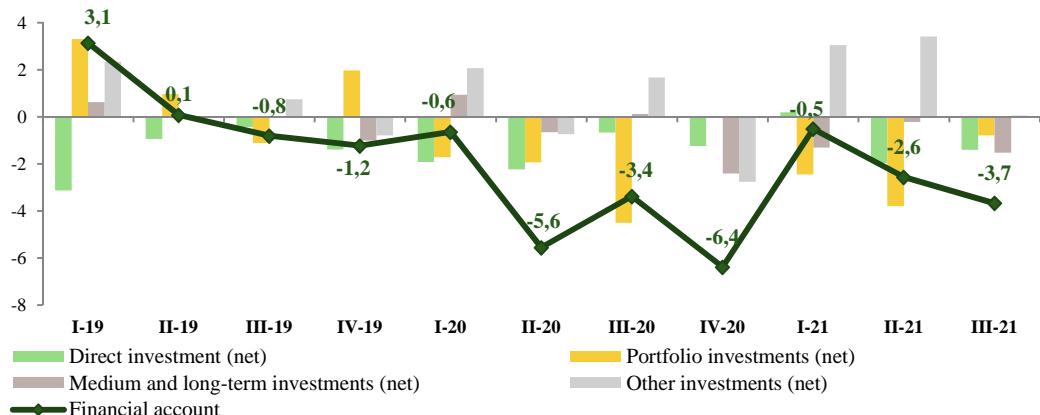

Table 2

**Financial account balance (excluding reserve assets)
by sectors of the economy**

("+" - increase in assets/liabilities; "-" - decrease in assets/liabilities)

	<i>millions of US dollars</i>

Banks	2552.6	-1610.7	735.9
Net acquisition of financial assets	1647.8	-837.8	1832.5
including on direct investment operations	71.1	2.3	112.2
Net commitment	-904.8	772.9	1096.6
including on direct investment operations	137.9	242.1	197.5
Government bodies	-1201.0	-5305.9	-7004.1
Net acquisition of financial assets	-571.7	-5729.3	-4474.2
Net commitment	629.2	-423.4	2529.9
Other sectors	1129.0	-2722.8	996.2
Net acquisition of financial assets	4004.4	4236.0	7779.7
including on direct investment operations	-2306.4	1027.6	961.3
Net commitment	2875.4	6958.8	6783.5
including on direct investment operations	2343.6	5773.9	4342.2

In the structure of the financial account by type of investment, net capital inflow is recorded for direct investment, portfolio and other medium- and long-term investments, and net outflow of resources - for short-term investments (Figure 2).

Figure 2. Structure of the financial account (billion US dollars)

Direct investments

For *foreign direct investment* (FDI) net capital inflow (negative balance) for 9 months of 2021 amounted to \$3.2 billion roubles (\$4.8 billion for 9 months of 2020) and was provided by the growth of residents' liabilities (Table 3).

Table 3

Direct investment balance

("+" - increase in assets/liabilities; "-" - decrease in assets/liabilities)

	9 months 2019	9 months 2020	9 months 2021
Direct investment (net)	-4500.6	-4820.0	-3185.3
<i>By asset/liability principle</i>			
Net acquisition of financial assets	-2019.1	1195.9	1354.3
Equity participation other than reinvestment of income	-2269.5	724.0	180.1
Reinvestment of income	50.0	-10.8	19.1

Net commitment	2481.5	6015.9	4539.7
Equity participation other than reinvestment of income	-2135.5	413.4	618.0
Reinvestment of income	6673.2	3361.1	8186.6
Debt instruments	-2056.1	2241.4	-4264.9
<i>According to the principle of "direction of investment"</i>			
Direct investment abroad (net outflow)	-2 260	-2 174	1 159
Direct investment in Kazakhstan (net inflow)	2240	2646	4 344
<i>Reference:</i>			
Gross inflow of direct investments into Kazakhstan from foreign direct investors	18 718	12 618	18 753
Gross outflow of direct investments abroad from Kazakhstani direct investors	2232	1 113	1511

The net acquisition of financial assets under FDI operations for \$1.4 billion is related to the financing of foreign affiliated companies by Kazakhstani enterprises.

The net incurrence of FDI liabilities amounted to \$4.5 billion. The increase in residents' FDI liabilities was secured by the reinvestment of non-residents' income (retained earnings attributable to direct investors). The decrease in debt obligations to foreign affiliates partially offset the increase in FDI liabilities.

The gross inflow of foreign direct investment (FDI) into Kazakhstan increased by 48.6% compared to the indicator for 9 months of 2020 and amounted to \$18.8 billion. Investments in the *production of crude oil and natural gas* (34.5% of the gross inflow of FDI for 9 months of 2021) increased by 30.4% and amounted to \$6.5 billion. Foreign direct investment in the *metallurgical industry* (15.8% of gross FDI inflow) increased by 62.4% to \$3.0 billion,

wholesale and retail trade, motor vehicle repair (15.3% of gross FDI inflow) increased by 59.7% to \$2.9 billion, *transport and warehousing* (4.4% of gross FDI inflow) increased by 38.0% to \$823.5 million, in *financial and insurance activities* (5.9% of gross inflow of FDI) - increased by 58.0% and amounted to \$1.1 billion.

The structure of gross FDI inflow by country is dominated by the Netherlands (29.0% of gross FDI inflows), followed by the USA (16.9%), Switzerland (10.3%), China (8.0%), Russian Federation (7.2%), United Kingdom (4.2%), Belgium (4.2%), Turkey (2.9%) and France (2.5%).

Portfolio investments and derivative financial instruments

The net inflow on *portfolio investments* for 9M 2021 of USD 7.0 billion (USD 8.2 billion for 9M 2020) is due to a decrease in residents' assets and an increase in their liabilities (Table 4).

Table 4

Debt securities	-1030.9	-172.1	-68.0
Portfolio investment balance	3154.3	-8154.4	-7030.8

Portfolio investment financial assets decreased by \$4.7 billion mainly due to a decrease in foreign securities in the portfolio of General Government and Other Sectors.

Portfolio investment liabilities increased by \$2.3 billion due to the placement by the Ministry of Finance of the Republic of Kazakhstan of bonds in Russian rubles, the issue of eurobonds of the Development Bank of Kazakhstan JSC, as well as purchases by non-residents in the secondary market of short-term NBRK notes and securities of the Ministry of Finance RK.

On operations with *derivative financial instruments*, the negative balance amounted to \$62.9 million (a positive balance of \$82.7 million for 9 months of 2021). Transactions with derivative instruments were made by Kazakhstani banks and non-banking organizations mainly hedging export earnings in foreign currency.

Other investments

For transactions recorded under *Other investments*, the net outflow (surplus) amounted to \$3.4 billion (\$3.3 billion for 9 month of 2020) as a result of the growth of residents' assets.

Financial assets in the item *Other investments* increased by \$8.7 billion (Table 5) mainly due to the growth of assets of banks, the National Fund of the Republic of Kazakhstan and Kazakhstani enterprises in foreign accounts.

Table 5

Other requirements	3381.1	1793.3	2547.3
Net acquisition of financial assets, total	3828.3	4504.8	8696.6

Obligations for *medium-term investments* increased by \$2.4 billion (Table 6). The increase in liabilities was secured by the attraction of a government loan from the Asian Infrastructure Investment Bank in the amount of 661.8 million euros and an increase in non-residents' funds on long-term deposits in Kazakhstan banks, as well as the receipt of SDRs in the amount of 1.1 billion SDRs (\$1.57 billion) allocated by the IMF as part of the distribution among member countries (according to the methodology, distributed SDRs are reflected both in operations with reserve assets and in other debt obligations of the NBK to the IMF).

Short-term investments increased by \$2.9 billion due to an increase in liabilities on short-term loans of banks and Kazakhstani enterprises, accounts payable of Kazakhstani enterprises, as well as due to an increase in banks' liabilities on accounts and short-term deposits.

¹ GDP in US dollars or CAR for the relevant period is used for calculating the comparative parameters for the period.

² For calculation the relative parameters at the end of the period (except for the value at year-end period) is used GDP in US dollars for all four quarters preceding the reporting date, which is defined as the sum of quarterly GDP values in US dollars calculated on the corresponding average quarterly exchange rate. For calculation the parameters of the end of the year is used GDP in US dollars for the calendar year according to the data of the Bureau of National statistics of Agency for Strategic planning and reforms of the Republic of Kazakhstan (BNS ASPR RK) calculated at the average exchange rate for the year.

³ Data of the BNS ASPR RK. Reporting data for the 9 months of 2021 was published on December 28th, 2021.

⁴ Information about GDP in USD for the calendar year is provided by BNS ASPR RK.

Foreign trade and trade balance

For 9 months of 2021, foreign trade turnover according to the classification of the balance of payments (taking into account amendments to official statistics and adjustment of the value of CIF imports to FOB prices) amounted to \$71.5 billion, \$8.5 billion more than in the base period¹. Growth in trade turnover by 13.5 % was due to an increase in exports by 20.6 % growth in imports by 4.0 % (Appendix I.3).

The indicator of economic openness, calculated as the ratio of trade turnover to GDP, increased by 2.7 percentage points compared to the base period (hereinafter - p.p.) as a result of a decrease in the share of exports by 1.9 p.p. and an increase in the share of imports by 0.7 p.p. (Table 1).

Table 1

	Openness of the Economy (as a percentage of GDP)		
	9 months 2019	9 months 2020	9 months 2021
Export	35.3	32.0	34.7
Import	23.8	25.5	23.6
Trade turnover	59.1	57.5	58.3

The official *export of goods* for 9 months of 2021 amounted to \$43.3 billion, which is \$7.4 billion more than the base period (Table 2).

Non-ferrous metals	3456.7	9.6%	4605.7	10.6%
Corn	895.0	2.5%	1,124.6	2.6%
Other goods	2686.8	7.5%	3428.2	7.9%

The growth in value exports was mainly due to an increase in the supply of oil and gas condensate by \$3.6 billion (by 19.0%) to \$22.3 billion. The share of this group in total exports fell by 0.7 p.p., as a result, the export commodity concentration ratio decreased from 70.3% in the base period to 69.5% in the reporting period (Appendix I.4). The increase in the cost of oil and gas condensate is associated with an increase in average contract prices by 31.0%. At the same time, the quantitative supply of oil decreased by 9.2% (by 5.0 million tons), in total, 49.9 million tons of oil were exported in the amount of \$22.3 billion.

An increase in the value of exports was recorded for all major commodity groups of the export nomenclature.

¹Here and below, 9 months of 2021 are considered as the reporting period, and 9 months of 2020 are considered as the base period .

The increase in total grain exports (by 25.7%) was mainly due to an increase in physical volumes by 15.3% to 4.9 million tons, with an increase in the price factor by 9.0% from \$211.6 per ton to \$230.7 per ton.

The export of non-ferrous metals increased by \$1.1 billion (33.2%) solely due to an increase in the average contract price by 48.5% with a reduction in physical deliveries by 10.3% (94.1 thousand tons).

In the group of non-ferrous metals, growth in cost volumes was noted for zinc - by \$46.5 million (by 10.3%) lead by \$7.4 million (by 10.2%), aluminum by \$141.2 million (by 41.8%) and copper by \$748.7 million (by 38.2%).

The growth of average contract prices for the group of non-ferrous metals is observed for copper by 55.7%, aluminum by 33.8%, zinc by 30.4% and lead by 76.9%.

The world market for non-ferrous metals shows an increase in prices for zinc by 34.5% compared to the base period, for aluminum - by 45.7%, for lead - by 20.0%, for copper - by 57.4%.

The price factor played a significant role in increasing the value of exports of ferrous metals. With an increase in the price component by 45.8% and an increase in physical deliveries by 6.1%, the cost volume of exports of ferrous metals increased by 54.7%.

A price increase in the group of ferrous metals was recorded for rolled ferrous metals by 83.4%, for ferroalloys an increase in the contract price by 35.8% was noted (Appendix I.5).

According to the official data of the authorized bodies, the *import of goods* for 9 months of 2021 amounted to \$29.5 billion which is \$816.2 million more than in the base period (Table 3).

Table 3

Commodity structure of imports of the Republic of Kazakhstan²
(imports in CIF prices according to official statistics)

Product group	9 months 2020		9 months 2021	
	Cost (millions of USD)	Specific gravity (in %)	Cost (millions of USD)	Specific gravity (in %)
All goods	28,651.9	100%	29,468.1	100%
Consumer goods	7229.6	25.2%	8,861.1	30.1%
Foodstuffs	2204.8	7.7%	2486.9	8.4%
Non-food products	5,024.8	17.5%	6374.2	21.6%
Intermediate goods	13,282.6	46.4%	14,147.5	48.0%
Means of production	8,139.7	28.4%	6459.4	21.9%

The largest growth occurred in groups of non-food and intermediate goods in the structure of imports.

An increase in the import of cars by \$507.3 million (2 times) to \$1.0 billion, clothing and footwear by \$331.1 million (by 46.1%) to \$1.0 billion caused an increase by 26.9% (by \$1.3 billion) due of non-food imports.

The share of medicinal products in non-food imports decreased from 16.5 % to 12.2%. The import of medicines decreased by \$53.9 million (6.5%) to \$777.0 million. The share of cars in non-food imports increased from 10.0% to 15.9%.

Imports of goods of intermediate industrial consumption which occupies a leading position in terms of share in total imports (48.0%) increased by 6.5% (by \$864.9 million) due to an increase

²National Bank of the Republic of Kazakhstan from 2 quarter of 2021 switched to the classification of goods by broad economic categories (BEC) according to the UN methodology

in imports of lead ores and concentrates by \$200.7 million to \$271.4 million, vaccines by \$171.4 million to \$240.0 million, coke by \$103.0 million to \$257.8 million.

The reduction in capital goods by 20.6% (by \$1.7 billion) was mainly due to a decrease in imports of air pumps by \$944.4 million to \$117.4 million, and telephone switches by \$261.7 million to \$12.4 million, other industrial equipment and machinery - by \$1.4 billion to \$96.4 million, ferrous metal containers - by \$260.7 million to \$13.7 million. At the same time, the group of production facilities recorded an increase in imports of digital data processing units by \$779.3 million to \$893.7 million.

The geographical structure of officially registered foreign trade in goods for 9 months of 2021 was as follows: 33.4% of trade turnover falls on Asian countries (including China - 18.5%), European countries - 31.2% (including Italy - 9.2%), to the CIS countries - 31.7% (including 23.6% - to the Russian Federation), other countries - 3.7% (Appendix I.6).

According to the official statistics, trade turnover with member countries of the ***Eurasian Economic Union*** increased by 28.4% in the reporting period and amounted to \$18.5 billion due to the growth of both exports by 39.2% and imports - by 24.2%.

The trade turnover with the states of the ***European Union*** grew in the reporting period by 18.6% to \$21.7 billion with an increase in exports by 28.3% and a decrease in imports by 8.9%. Net exports of goods to the EU countries amounted to \$13.1 billion (\$8.8 billion in the base period).

In trade with the ***Russian Federation*** the trade turnover increased by 29.6% and amounted to \$17.2 billion, while exports grew by 43.0% and imports - by 24.7%.

Coverage adjustments:: The turnover of individuals «shuttle» trade (not taken into account by official statistics) was estimated for the reporting period at 182.6 million dollars, including the value of goods exported from Kazakhstan amounted to more than 36.1 million dollars, and goods imported goods - 146.3 million dollars. The negative balance of "shuttle" trade amounted to 110.2 million dollars (Appendix I.3).

According to the reporting data of transport enterprises, the cost of purchasing fuel and food abroad (import) exceeded \$36.7 million, while similar costs of transport companies of non-residents in Kazakhstan (export) amounted to \$83.7 million.

As a result for 9 months of 2021, the positive ***trade balance*** amounted to \$14.9 billion having increased relative to the base period by \$6.3 billion taking into account adjustments for coverage, classification (adjusting the value of CIF imports to FOB prices) and goods purchased by transport organizations in ports.

Appendix I.2

Balance of international services

Foreign trade turnover in services for 9 months of 2021 amounted to about \$9.6 billion having decreased by 4.5% compared to the same indicator for 9 months of 2020¹. **The deficit in the balance of international services** amounted to \$1.2 billion with an increase in exports of services by 11.3% and a decrease in imports of services by 14.0% (Table 1).

The most deficit item in the balance of international services - *other business services* - has developed with a deficit of more than \$1.3 billion. The main surplus item in the balance of services is *transport services*. The surplus on them amounted to \$1.4 billion having increased by \$590.8 million (by 69.6%) during the reporting period.

Throughout the reporting period, the **export of services** amounted to \$4.2 billion having increased by \$424.5 million compared to the base period. The main dominant item in the export of services is transport services, which in the structure of exports account for almost 69.0% of the volume of exported services.

Income of residents from the transportation of non-residents' cargo in the reporting period amounted to \$2.5 billion (15.0% more than in the base period). The income of domestic transport companies from the pipeline transit of oil and gas through the territory of the republic accounts for more than 64.8% of the cost of all international freight traffic.

Table 1

Components of the balance of international sevices

(9 months 2021 vs 9 months 2020)

millions of US dollars

	Export		Change (increase (+), decrease (-))	Import		Change (increase (+), decrease (-))
	9 months 2020	9 months 2021		9 months 2020	9 months 2021	
TOTAL	2 605,1	2 668,8	2,4%	4 387,0	3 369,3	-23,2%
Services for the processing of material resources	29,11	45,19	55,3%	87,6	83,2	-5,1%
Repair and maintenance services	27,2	21,7	-20,2%	173,1	157,9	-8,8%

Services related to tourism (travel)	355,0	236,8	-33,3%	477,9	559,2	17,0%
Building	26,0	52,4	101,6%	50,6	48,6	-3,8%
Insurance and pension services	73,4	65,4	-10,9%	25,5	33,6	32,1%
Financial services	49,7	70,9	42,6%	82,38	99,83	21,2%
Telecommunication, computer and information services	72,8	76,3	4,8%	184,8	175,0	-5,3%

¹Hereinafter, 9 months of 2021 are considered as the reporting period , and 9 months of 2020 are considered as the base period.

	Export		Change (increase (+), decrease (-))	Import		Change (increase (+), decrease (-))
	9 months 2020	9 months 2021		9 months 2020	9 months 2021	
Payment for the use of intellectual property	1,0	0,5	-54,1%	60,2	74,2	23,2%
Other business services	234,6	171,2	-27,0%	2 164,8	1 134,6	-47,6%
Services to individuals and services in the field of culture and recreation	1,3	0,4	-67,4%	15,1	14,2	-6,0%
Public services	91,54	98,83	8,0%	55,5	77,3	39,2%

The income of passenger air carriers increased by 30.9% (from \$97.2 million to \$127.3 million) relative to the base period in the reporting period.

Income of residents slightly decreased by 1.6% from \$401.4 million to \$395.0 million in the reporting period due to the

Import of services for the reporting period amounted to \$5.4 billion having decreased by 14.0% compared to the base period. The share of imports in Kazakhstan's foreign trade turnover in services decreased from 62.6% in the base period to 56.4% in the reporting period.

The predominant share in the import of services is the expenses of residents for the purchase of *other business services* (29.9% of the total import of services) largely related to the implementation of large infrastructure projects in the territory of the republic. In the structure of *other business services* provided by non-residents the largest expenses fall on architectural and engineering services (51.1% of other business services) as well as business consulting and management services (21.7% of other business services).

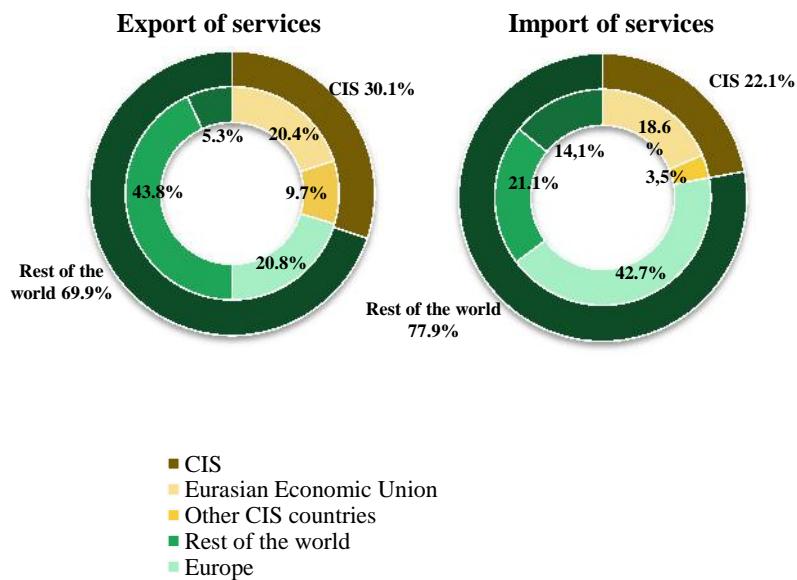

Expenditures of Kazakhstani on *trips abroad* increased by 87.9% compared to the base period, increasing from \$629.0 million to \$1182.1 million.

Income of non-residents from transport services amounted to \$1.4 billion down 11.6% or \$190.2 million due to a decrease in freight carriers of all modes of transport and other ancillary transport services.

The EAEU countries accounted for 19.4% at the end of the reporting period in the geographical structure of foreign trade turnover in services. The main consumers of Kazakhstani services are China and the EAEU countries, whereas the main suppliers of purchased services are the countries of Asia and Europe (Figure 1).

Analytical tables on foreign trade in services by types of services by countries and by regions of the Republic of Kazakhstan are posted on the website of NBRK in the section of balance of payments statistics.

¹Coefficient of commodity concentration is calculated as the square root of the sum of squares of the ratios of export /import of certain product groups to their aggregate volume. Increase of coefficient means the growth of share of certain group of goods in total.

Analysis of price and quantity of supplies for export of certain goods according to official statistics data

Code	Name of commodity group	January - September 2021	January - September 2021	January - September 2020	Increase (+)/ decrease (-) of exports for the 9 months of 2021 compared to the 9 months of 2020	millions of US dollars

*) Due to estimate changes Personal Transfers' data have been revised since 2012

**) IMTS - international money transfer systems

The personal transfers are part of the current account of the balance of payment (part of current transfers or secondary income account).

The personal transfers include all current transfers (gratuitous transfer) between resident households and nonresident households.

Transfers to Kazakhstan are transfers received by resident household from nonresident households (in the balance of payments are classified in secondary income account in Credits).

Transfers from Kazakhstan are transfers sent abroad by resident households to nonresident households (in the balance of payments are classified in secondary income account in Debits).

The methodology of estimation is on the "comments" list.

¹ The private sector also includes banks and other organizations with direct or indirect government participation

Methodological commentary

Financial operations include all transactions by the private sector registered in the financial account of the balance of payments, as well as errors and omissions.

The private sector includes all residents except for the Government of the Republic of Kazakhstan and the National Bank of Kazakhstan ("General government" and "Central bank" sectors in the balance of payments).

For the purposes of this table, net acquisition of assets recorded in the financial account of the balance of payments is shown with the opposite sign: an increase in assets is presented with a "minus" sign, whereas a decrease - with a "plus" sign. Accordingly, aggregates (The Private Sector financial operations, Banks, Other sectors, Transactions of the Government of the Republic of Kazakhstan and the National Bank of Kazakhstan, Financial account (excluding reserve assets)) are also presented with the opposite sign to that used in the balance of payments. Thus, outflow of capital includes transactions related to an increase in external assets or a reduction in external liabilities in this table. Inflow of capital is provided by an increase in external liabilities or a reduction in external assets.

External assets include investments of residents in foreign stocks or debt securities, loans and credits granted by residents to nonresidents, receivables of residents from nonresidents, foreign currency belonging to residents, residents' accounts abroad and other assets.

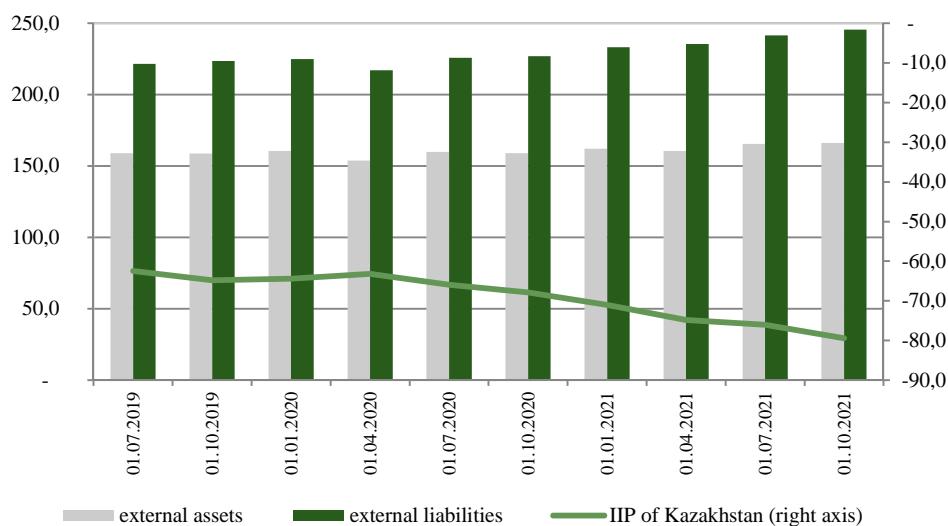

External liabilities include investments of nonresidents in domestic stocks or debt securities, loans and credits granted by nonresidents to residents, payables of residents to non-residents, nonresidents' accounts in domestic banks and other liabilities.

Assuming that the errors and omissions in the balance of payments are mainly formed by the non-bank private sector transactions, this item is included in the calculation of net inflows/outflows of capital from other sectors.

**INTERNATIONAL INVESTMENT POSITION
OF THE REPUBLIC OF KAZAKHSTAN
as of October 1st, 2021**

Net International Investment Position (further – IIP) that is equal to the difference between stock positions of external assets and external liabilities as of October 1st, 2021 amounted to (-) \$79.4 billion (Diagram 2).

Diagram 2. IIP of Kazakhstan (billion USD)

Net IIP shows a difference between what a country owns and what it owes to the rest of the world. As a result of a significant increase in liabilities compared to an increase in assets of residents, net IIP for nine months of 2021 **deteriorated by \$8.3 billion** (Appendix 3).

The main reason of the increase of assets and liabilities was caused by the balance of payments' operations (assets (+) \$6.5 billion and (+) \$12.1 billion in liabilities) with minor non-operational changes (Table 1).

Table 1
Operational and other changes of IIP of Kazakhstan

billions of US dollars

	IIP, as of Jan 1 st , 2021	IIP changes during the 9 months of 2021			IIP, as of Oct 1 st , 2021	Investment income during the 9 months of 2021 operational

IIP of Kazakhstan	-71,0	-5,7	-1,5	-1,1	-79,4	-16,7

External assets of the country as of October 1st, 2021 were \$166.0 billion, increased by \$4.0 billion since the beginning of the year mainly due to an increase in residents' funds in foreign bank accounts (net increase of \$5.0 billion) in all economic sectors, including the National Fund.

External liabilities as of October 1st, 2021 amounted to \$245.4 billion, increased by \$12.3 billion since the beginning of the year mainly due to an increase in the volume of non-residents' share in the capital of local Kazakhstani companies, including surplus and growth of Governmental debt securities owned by non-residents. This growth was partially offset by the repayment of external loans from foreign direct investors and foreign fellow enterprises.

In the breakdown of IIP by Kazakhstan's economic sectors, as of October 1st, 2021 the Central bank and the General Government are characterized as 'net investors' to the rest of the world (Appendix 3).

A significant portion of external assets of the General government account mainly contains foreign assets of the National Fund, which amounted to \$52.9 billion as of October 1st, 2021 or 32% of the external assets of the country. The external assets of the Central Bank are mainly represented by reserve assets, the volume of which as of October 1st, 2021 amounted to \$35.5 billion, or 21% of the country's external assets.

¹ net means assets minus liabilities² according to the asset/liability principle³ financial derivatives in reserve assets of the National Bank of Kazakhstan and the National Fund of Kazakhstan are accounted according to the sixth edition of the Balance of Payments and International Investment Position Manual; therefore, these data in the IIP statistics can be slightly different than the data in other sources due to specific differences in methodology.⁴ debt securities, issued according to the laws of other countries and on their territory, are presented by the country of trustee-nonresidents⁵ Not determined by country:

- in assets and liabilities: financial derivatives ("Banks" sector);

- in liabilities: syndicate of foreign banks, from which attracted government loans (Ministry of Finance of Kazakhstan); non-residents' deposits and accounts in Kazakhstan banks;

- in reserve assets: monetary gold.

External liabilities of residents of Kazakhstan by types of their economic activity and the main countries

¹ according to the asset/liability principle² debt securities, issued according to the laws of other countries and on their territory, are presented by the country of trustee-nonresidents³ Other countries: also includes non-residents' deposits and accounts in Kazakhstan banks⁴ Other countries: also includes syndicate of foreign banks, from which attracted government loans (Ministry of Finance of Kazakhstan)

* includes geological exploration and prospecting activities

External debt of the Republic of Kazakhstan as of Oct 1, 2021

External debt of the Republic of Kazakhstan as of Oct 1, 2021 was equal to **\$166.5 billion**, of which: **11.4%** or \$19.0 billion is the “Governmental sector” debt, **3.4%** or \$5.7 billion – debt of “Banks” sector, **26.4%** or \$43.9 billion is the debt of the “Other sectors”, except direct investments, and other **58.8%** or \$97.9 billion was Intercompany debt (Figure 3).

Figure 3. Instrumental breakdown of external debt

The external debt **increased by \$2.4 billion for nine months of 2021**, including \$3.3 billion of operations of balance of payment, which were partially offset by exchange rate and value's overestimation and other non-operational changes.

The debt of the “**Governmental sector**” equals to \$19.0 billion, increased by \$3.8 billion since the beginning of the year due to issuance of the sovereign ruble bonds on the Moscow Exchange by the Ministry of Finance of the Republic of Kazakhstan, and also due to attraction of the loan from the Asian Infrastructure Investment Bank to finance the country's budget's deficit in 2021, and also the increased demand for notes of NBK and Eurobonds of the Ministry of Finance of the Republic of Kazakhstan from foreign investors, and also inflow of SDR in the amount of SDR 1.1 billion (\$1.57 billion), which were emitted by IMF in the framework of allocation among member countries.

The debt of “**Banks**” sector increased by \$0.9 billion and equals to \$5.7 billion due to the fact of issue of Eurobonds by Kazakhstan Development Bank in Kazakhstani tenge and US dollars, increase in liabilities in short-term loans, and the fact of inflow of non-resident funds to accounts in Kazakhstan banks.

The external debt of “**Other sectors**” to unaffiliated creditors amounted to \$43.9 billion, which showed up an increase of \$2.0 billion since the beginning of the year mainly due to the growth in the accounts payable of Kazakhstani enterprises including large exporters, and wholesale and retail trade enterprises.

Intercompany debt decreased by \$4.3 billion to \$97.9 billion due to repayment of intergroup loans (from foreign direct investors and foreign fellow enterprises) by oil and gas companies.

The ratio of external debt to GDP equaled to 90.8% as of Oct 1, 2021 compare to 95.9% at the end of 2020, improved by 5.0% since the beginning of the year.

Net external debt of the Republic of Kazakhstan was equal to \$64.8 billion, increased by \$0.2 billion since the beginning of the year as of Oct 1, 2021. At the same time, Governmental and financial sectors were “net creditors” to the rest of the world, and the corporative sector was “net lender”.

Net external debt of “**Other sectors**” as of Oct 1, 2021 equaled to \$100.1 billion, decreased by \$6.7 billion for nine months of 2021. At the same time, the intercompany debt plays the leading role in the structure of external debt liabilities, and its volume was equal to \$97.9 billion or 58.8% of country’s external debt. All in all, the intercompany debt (by 68.6%) consists of liabilities of implementation by foreign companies’ branches of huge oil and gas projects on the territory of Kazakhstan, and is largely conditional (is not a cash redemption, or correlation on oil price, or unprofitability, or any other reason).

External debt: standard presentation

Debt service schedule includes projected repayments of the principal on gross external debt outstanding on 01.10.2021 - row "Principal" and the projected future payments of interest - row "Interest", which will be accumulated by 30.09.2023 on the principal amount outstanding, taking into account its projected repayments

The "till called for" column includes:

"Central Bank", "Banks" - liabilities by correspondent and current accounts, call deposits of nonresidents and arrears
 "Other sectors", "Direct investment: Intercompany lending" - arrears on debt securities, loans

The article "Other sectors" does not include Intercompany lending, which is presented as an independent article in the External Debt structure

The part of the external debt, on which National Bank does not have repayment schedule, is shown:

- the debt outstanding on long term trade credits and loans is included in the "no information" column;
- the short term debt outstanding on trade credits and loans is equally split between four consecutive quarter, following the reporting date (01.10.2021)

¹ Including foreign currency debt, source of information of which does not allow further breakdown of the debt by type of currency

The column "No information" shows the balance of external debt, on which the National Bank of Kazakhstan does not have information:

- In the General government sector - the debt on trade (commercial) loans given by non-residents
- In the Banks' sector - the column "No information" shows the amount of other liabilities to nonresidents, on which there is no information;
- In the Other sectors and intercompany lending - the column "No information" mainly contains information on the debt of residents on trade (commercial) loans to non-residents and other liabilities to nonresidents, on which no information is available.

Debt securities (issued by residents and belonging to non-residents) by the location of the issue

¹as a result of fluctuations in price and exchange rate

²changes in the value of assets that are neither to transactions nor revaluation, including those due to cancellation and write-offs, economic appearance and disappearance of assets, reclassifications, changes in financial volume arising from entities changing their economy of residence, as well as corrections of errors of previous periods

Methodological commentary to the balance of payments and the international investment position

The international accounts for an economy summarize the economic relationships between residents and nonresidents. They comprise the following¹: the balance of payments (BOP), International Investment Position (IIP), and other changes in financial assets and liabilities accounts.

The international accounts provide an integrated framework for the analysis of an economy's international economic relationships, including its international economic performance, exchange rate policy, reserves management, and external vulnerability.

From the first quarter of 2013, Kazakhstan's balance of payments, international investment position and external debt is compiled in accordance with the sixth edition of "Balance of Payments and International Investment Position Manual" (BPM6). The main changes are connected with transition to the new methodology compilation of statistics provided in the Appendix III.4.

Methodological commentary to the balance of payments

The balance of payments is a statement that summarizes economic transactions between residents and nonresidents during a period.

Compilation and evaluation of BOP is conducted based on the BPM6 in accordance with standard accounting rules and definitions.

Main BOP compilation rules and definitions:

- recording of transactions between residents and nonresidents;
- recording of transactions according to double-entry system;
- recording of flows rather than stocks;
- valuation of transactions and transfers denominated in different currencies in a single unit of account;
- recording of transactions at the time of the change of ownership;
- recording of transactions by type and by sector.

Residents and nonresidents. Each institutional unit is a resident of one and only one economic territory with which it has the strongest connection, expressed as its center of predominant economic interest. An institutional unit is resident in an economic territory when there exists, within the economic territory, some location, dwelling, place of production or other premises on which or from which the unit engages and intends to continue engaging, either indefinitely or over a finite but long period of time, in economic activities and transactions on a significant scale.

Flows refer to economic actions and effects of events within an accounting period. International flows are recorded in the accounts as transactions or other changes in financial assets and liabilities. Flows reflect the creation, transformation, exchange, transfer, or extinction of economic value; they involve changes in the volume, composition, or value of an institutional unit's assets and liabilities.

Double-entry system

A transaction is an interaction between two institutional units that occurs by mutual agreement or through the operation of the law and involves an exchange of value or a transfer.

Each transaction involves two entries – a credit and a debit entry – for each party to the transaction. This principle ensures that the total of all credit entries and that of all debit entries for all transactions are equal, thus permitting a check on consistency of accounts for a single unit.

In the current and capital accounts, a credit denotes entries from exports, primary income receivable, transfers receivable, and disposals of nonproduced nonfinancial assets. A debit is used to record entries for imports, primary income payable, transfers payable and acquisitions of nonproduced nonfinancial assets.

¹ External debt is often attributed to the external sector statistics. Standard report on external debt is a structural part of the IIP, but due to its important analytical value, the external debt is usually regarded as a separate component of the external sector statistics

In the case of transactions in financial assets and liabilities, the terms “net acquisition of financial assets” and “net incurrence of liabilities” are used. The interpretation of increase (decrease) under the credit or debit notion depends on whether the increase (decrease) refers to assets or liabilities (a debit for an asset is an increase, a debit for a liability is a decrease).

In accordance with the double-entry basis of BOP statistics, each transaction is recorded as consisting of two entries where the sum of credit entries equals the sum of debit entries.

Transactions registration time is determined according to the accrual basis. Transactions are registered at the time when economic value is created, transformed, exchanged, transferred or extinguished. The emergence of financial claims and liabilities is associated with the change of ownership right for any resources from one party of an international transaction to another. Such a transition can be legalized, and may involve the actual transfer of resources or establishment of control over these resources by the other party. In the case of non-obvious transition of economic ownership right, the transition is considered to occur when parties of the transaction record it in their books or accounts.

Changes in the volume of assets and liabilities that occur as a result of transactions are recorded in the BOP. The BOP transactions involve both transactions that are accompanied by actual payments and those that do not involve cash payments.

Valuation of transactions. Transactions are valued at their actual market price recorded in contracts and agreements between independent parties of the transaction.

International accounts are formed for the following sectors: the central bank, banks (deposit-taking corporations except the central bank), general government, and other sectors including other financial corporations and nonfinancial corporations, households and nonprofit institutions serving households (NPISHs). Classification and sectorization systems meet international standards.

Main BOP accounts

Standard BOP structure consists of the following accounts: the current account (the goods and services, the primary income, the secondary income), the capital account and the financial account.

The current account shows flows of goods, services, primary income, and secondary income between residents and nonresidents. The current account balance shows the difference between the sum of exports and income receivable and the sum of imports and income payable (exports and imports refer to both goods and services, while income refers to both primary and secondary income).

The current account and capital account exclude the use of a "minus" sign while showing imports of goods and services as well as primary and secondary incomes paid. At the same time, the balance of relevant accounts (goods, services, primary income and secondary income) is defined as the difference between the credit and the debit entries.

Current account:

Main components of the “**Goods**” account are export and import of goods on a balance of payments basis, net exports of goods under merchanting, nonmonetary gold.

Nonmonetary gold covers all gold other than monetary gold. In its turn, monetary gold is a financial asset that is not created by an instrument and that does not represent a claim on another entity and acts as a means of international payments and store of value for use in reserve assets.

Export and import of general merchandise on a balance of payments basis covers goods (as well as re-export), whose economic ownership is changed between a resident and a nonresident and that are not included in the following specific categories: goods under merchanting, nonmonetary gold, parts of travel, construction, and government goods and services not included elsewhere.

Re-exports are foreign goods (goods produced in other economies and previously imported) that are exported with no substantial transformation from the state in which they were previously imported.

Merchanting is defined as the purchase of goods by a resident (of the compiling economy) from a nonresident combined with the subsequent resale of the same goods to another nonresident without the goods being present in the compiling economy.

The difference between sales over purchases of goods for merchanting is shown as the item “net exports of goods under merchanting”. As a result of losses or increases in inventories, net exports of goods under merchanting may be negative in some cases.

Nonmonetary gold in the form of bullion or other forms is shown as a separate article in the goods.

Services cover the services that are performed by residents for nonresidents and vice versa. The following types of services are included in the BOP: manufacturing services on physical inputs owned by others; maintenance and repair services; transport (including postal and courier services); travel; construction; insurance and pension services; financial services; charges for the use of intellectual property not included elsewhere; telecommunications; computer and information services; other business services; personal, cultural, and recreational services; government goods and services not included elsewhere.

In accordance with the balance of payments basis, the time of recording of service entries in the international accounts is the time at which the service is delivered. The provision of services should be recorded on an accrual basis in each accounting period, i.e. they should be recorded as they are rendered. To the extent that the time of payment differs from the time of delivery, there may be trade advances (financial assets and liabilities that are extinguished as the service is provided) or trade credits (financial assets and liabilities that arise as the service is provided).

Primary income includes compensation of employees, investment income and other primary income.

Compensation of employees presents remuneration in return for the labor input to the production process contributed by an individual in an employer-employee relationship with the enterprise. In international accounts compensation of employees is recorded when the employer and the employee are resident in different economies.

Compensation of employees has three main components:

- 1) wages and salaries in cash;
- 2) wages and salaries in kind;
- 3) employers' social contributions.

Investment income is the return for providing financial assets, including dividends, reinvested earnings and interest, that is, income from direct, portfolio, other investments and reserve assets.

Dividends are distributed earnings allocated to the owners of equity for placing funds at the disposal of the corporation.

Reinvested earnings represent the direct investor's proportion, in terms of equity held, of the earnings that foreign subsidiaries and associates do not distribute as dividends. In some cases reinvested earnings can be negative, for example, when a direct investment enterprise experiences a loss or when the dividends payable in a period exceed the net income in that period. Similar to positive reinvested earnings that are treated as a capital injection in the direct investment enterprise by the direct investor, negative reinvested earnings are considered to be a withdrawal of funds from the capital.

Interest is a form of investment income that is receivable by the owners of certain kinds of financial assets namely deposits, debt securities, loans, and other accounts receivable and payable for putting the financial asset at the disposal of another institutional unit. Interest is recorded on an accrual basis, that is, interest is recorded as accruing continuously over time to the creditor on the amount outstanding.

Investment income attributable to policy-holders in insurance, standardized guarantees, and pension funds represents returns to policyholders on their claims in insurance and standardized guarantee schemes in the form of technical reserves and income payable on pension entitlements.

Other primary income includes taxes on production and imports, subsidies and rent.

Secondary income account shows current transfers between residents and nonresidents. Current transfers represent compensating entries that correspond to the provision of a good, service, financial asset or another nonproduced asset when there is no corresponding return of an item of economic value. This article covers grants, humanitarian and technical aid, government contributions to various international and intergovernmental organizations, taxes and personal transfers. Current

transfers are classified according to institutional sectors making or receiving transfers. The balance on the secondary income account presents total receipts less total payments.

Capital account

Capital account covers any international transactions with nonproduced, nonfinancial assets and capital transfers between residents and nonresidents. Nonproduced, nonfinancial assets consist of natural resources, contracts, leases, licenses and marketing assets.

Capital transfers are transfers in which the ownership of an asset (other than cash or inventories) changes from one party to another or which obliges one or both parties to acquire and dispose of an asset (other than cash or inventories) or where a liability is forgiven by the creditor.

Financial account

The financial account records transactions that involve financial assets and liabilities and that take place between residents and nonresidents.

The financial account indicates the functional categories, sectors, instruments and maturities used for net international financing transactions. Flows in financial assets and liabilities in international accounts are recorded on net basis. Change in external debt as a result of the revaluation of assets and liabilities in the financial account is not recorded. Entries in the financial account can be corresponding entries to goods, services, income, capital account and other financial account entries.

In the financial account the terms “net acquisition of financial assets” and “net incurrence of liabilities” are used instead of “assets” and “liabilities”. If there is an increase of assets or liabilities, it is shown with a “plus” sign; if there is a decrease in assets or liabilities, it’s shown with a “minus” sign. The balance on the financial account is defined as the difference between assets and liabilities.

Financial assets consist of claims of residents on nonresidents and “gold bullion” component under monetary gold.

A claim is a financial instrument that gives rise to an economic asset, which corresponds to a balancing obligation.

In the financial account assets and liabilities are classified by their functional category by the following main components: direct investment, portfolio investment, financial derivatives and stock options for employees, other investments and reserve assets.

Direct investment is a category of cross-border investment associated with a resident in one economy having control or a significant degree of influence on the management of an enterprise that is resident in another economy (owns equity that entitles it to 10 percent or more of the voting power in the management of the direct investment enterprise). Direct investment is classified as investment by a direct investor in its direct investment enterprise, return investment by a direct investment enterprise in its own immediate or indirect direct investor, or investment between resident and nonresident fellow enterprises.

Direct investment transactions according to the type of financial instrument are divided into equity and investment fund shares, reinvestment of earnings and debt instruments.

Return investment arises when a direct investment enterprise lends funds to or acquires equity in its immediate or indirect direct investor provided it does not own equity comprising 10 percent or more of the voting power in that direct investor.

Fellow enterprises are enterprises that are under the control or influence of the same immediate or indirect investor but neither fellow enterprise controls or influences the other fellow enterprise.

Portfolio investments include transactions involving debt or equity securities other than those included in direct investment or reserve assets.

Financial derivatives and employees stock options are financial instruments that are linked to another specific (base) instrument and through which specific financial risks (interest rate and foreign exchange risk, equity and commodity price risk, credit risk, etc.) can be traded in their own right in financial markets. Derivative financial instruments are classified into forward-type contracts and options.

Other investment includes other equity, currency and deposits, loans, insurance and pension programs, standardized guarantee programs, trade credit and advances, other accounts receivable and payable, SDR allocations.

Other equity is included in other investments when it is not direct investment or reserve assets. Other equity is not in the form of securities, so it is not included in portfolio investments.

Reserve assets are external assets that are readily available to and controlled by monetary authorities for meeting the balance of payments financing needs, for intervention in exchange markets to influence the currency exchange rate and for other related purposes (such as maintaining confidence in the currency and the economy, and serving as a basis for foreign borrowing).

The imbalance in the balance of payments account is called ***net errors and omissions***. Net errors and omissions are derived residually as net lending/net borrowing and can be derived from the financial account minus the same item derived from the current and capital accounts.

The balance of payments has standard and analytic presentation. The standard presentation groups international transactions with goods, services, income and financial values consistent with the SNA and other macroeconomic statistics as a result of which the balance between transactions equals zero.

The analytic presentation is a reorganization of the standard presentation of balance of payments statistics to facilitate a basic distinction between reserves and closely related items and other transactions.

Methodological commentary to the international investment position

The international investment position (IIP) is a statistical statement that shows at a point in time the value and composition of:

financial assets of residents of an economy that are claims on nonresidents and gold bullion held as reserve assets;

liabilities of residents of an economy to nonresidents.

The difference between an economy's external financial assets and liabilities is the economy's net IIP, which may be positive or negative.

IIP consists of direct investment, portfolio investment, financial derivatives and employees stock options, other investment, and reserve assets.

The values in the IIP at the end of the period result from transactions and other flows in the current and previous periods. The integrated IIP statement consists of the IIP, the financial account and the other changes in financial assets and liabilities.

Other flows are changes in the volume, value, or classification of an asset or liability that do not result from a transaction between a resident and a nonresident. Other flows cover various kinds of changes in assets and liabilities that are recognized analytically under two broad types:

- 1) other changes in the volume of assets and liabilities reflect entrances of new assets into balance sheets and exits of existing assets and liabilities from balance sheets that are not caused by interactions by mutual agreement between institutional units (i.e.transactions)
- 2) revaluations (holding gains and losses) on an asset or liability arise from changes in their prices and/or the exchange rates.

IIP is compiled on the basis of BPM6. Methodological approaches to the compilation of the IIP and BOP completely coincide.

IIP and BOP compilation practices

Statistical reports on transactions with financial assets and liabilities serve as source data for the compilation of international accounts (BOP, IIP, external debt). Reports submitted by respondents are checked and revised according to the National Bank's results of registration and notification of foreign exchange transactions involving the movement of capital, as well as information from banks and professional participants of the securities market.

Calculating principles of analytical indexes and the balance of payments estimating items

1. Methodological principles for assessing the volume of "shuttle" trade

"Shuttle trade" includes value of the goods not registered by official customs statistics, which were purchased by individuals for commercial purposes (subsequent resale). The National Bank of Kazakhstan estimates such transactions to include them in the articles of the trade balance as an adjustment on coverage.

"Shuttle trade" transactions mainly occur with contiguous countries, therefore new estimated parameters for "shuttle trade" were calculated for following countries – Russia, Kyrgyzstan, Uzbekistan and China. New estimated parameters have taken into account changes in economic factors from 2012 (exchange rate, real income, purchasing power).

The total estimate of the imported and exported "shuttle trade" is calculated as the product of the number of "shuttle traders" and the average cost of their imported and exported goods.

Based on the raw data received from Border Service of the National Security Committee of the Republic of Kazakhstan on a number of individuals crossing the border for private purposes by country, total number of "shuttle traders" is calculated using certain weights. Crossing the border for private purposes implies travel as a tourist or private trips and doesn't include business trips.

Evaluation of the goods purchased during foreign travel with the purpose of subsequent resale is made within amounts that are free of duty for individuals crossing the border predominantly on foot or by car. Norms for the movement of goods for personal use which are exempted from customs duties do not apply to EAEU countries. Among the neighboring countries these norms apply to Uzbekistan and China.

New estimated parameters for "shuttle trade" were applied to the data starting from the first quarter of 2012 which was when current norms for the movement of goods for personal use were introduced.

Calculated shuttle trade parameters for trade with Russia estimate:

- for ***shuttle trade exports*** – share of "shuttle traders" in the total number of citizens of Russia arriving to Kazakhstan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Russia in US dollars;
- share of "shuttle traders" in the total number of citizens of Kazakhstan arriving to Russia by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Kazakhstan in US dollars;
- for ***shuttle trade imports*** – share of "shuttle traders" in the total number of citizens of Kazakhstan arriving to Russia by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Kazakhstan in US dollars.

Calculated shuttle trade parameters for trade with Kyrgyzstan estimate:

- for ***shuttle trade exports*** – share of "shuttle traders" in the total number of citizens of Kyrgyzstan arriving to Kazakhstan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Kyrgyzstan in US dollars;
- for ***shuttle trade imports*** – share of "shuttle traders" in the total number of citizens of Kazakhstan arriving to Kyrgyzstan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Kazakhstan in US dollars;
- share of "shuttle traders" in the total number of citizens of Kyrgyzstan arriving to Kazakhstan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Kyrgyzstan in US dollars.

Calculated shuttle trade parameters for trade with Uzbekistan estimate:

- for ***shuttle trade exports*** – share of "shuttle traders" in the total number of citizens of Uzbekistan arriving to Kazakhstan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Uzbekistan in US dollars;
- for ***shuttle trade imports*** – share of "shuttle traders" in the total number of citizens of Kazakhstan arriving to Uzbekistan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Kazakhstan in US dollars;
- share of "shuttle traders" in the total number of citizens of Uzbekistan arriving to Kazakhstan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Uzbekistan in US dollars.

Calculated shuttle trade parameters for trade with China estimate:

- share of "shuttle traders" in the total number of citizens of Kazakhstan arriving to «The International Center for Cross-Border Cooperation» Khorgos» for private purposes and the average value of goods for one "shuttle trader" - citizen of Kazakhstan in US dollars;
- share of "shuttle traders" in the total number of citizens of Kazakhstan arriving to China by car for private purposes and the average value of goods for one "shuttle trader" - citizen of Kazakhstan in US dollars;
- share of "shuttle traders" in the total number of citizens of China arriving to Kazakhstan by car for private purposes and the average value of goods for one "shuttle trader" - citizen of China in US dollars.

2. Methodological principles for estimating the value of imports in FOB prices and the calculation of transport costs during exports and imports of goods

Data generated on the basis of customs freight declarations of official statistics on the import of goods reflect the value of the goods at the customs border of Kazakhstan. That is, during an import of goods from countries that do not have a common border with Kazakhstan, the customs value of imported good in addition to the value of the good at the customs border of the importer (FOB-type valuation) includes the cost of insurance and freight transportation to the border of Kazakhstan (CIF-type valuation).

In the balance of payments the values of exports and imports of goods are recorded in the FOB-type prices (loading goods at the expense of the buyer) at the customs border of the seller of the goods, while the costs of insurance and freight transportation are reflected in the relevant articles of the balance of international services. Therefore, in order to accurately reflect the data in the balance of payments, a correction to the classification is introduced in the customs statistics data on import of goods - the costs of insurance and transportation, which are already included in the import of international services in the "insurance services" and "freight transportation" articles, are deducted from the CIF-type value of imports.

The sources for determining the share of the cost on insurance and freight transportation in the cost of imported goods are specialized surveys of exporters and importers which are held by the National Bank on an annual basis. On the basis of the survey results for 2002-2004. ("Questionnaire survey of enterprises on the costs of transportation and insurance during exports and imports of goods" as a form of statistical report was introduced in 2002) average estimated coefficients for recalculation of imports of goods from CIF prices to FOB prices and calculation of freight services by mode of transport were obtained. The coefficients were estimated across border countries and other countries.

In order to obtain comparable analytically significant amount of data on trade in goods and services, as well as to ensure the formation of the balance of services by expanded classification

(introduced by the International Monetary Fund in 2000), new estimated coefficients derived in 2004 were applied to the balance of payments data starting with 2000.

According to the results of specialized surveys subsequent revisions of estimated coefficients will be made if the survey data differs significantly from the average of the coefficients (for example, when new methods and routes of freight transportation appear). During revisions of the coefficients the principle of averaging data for periods that are characterized by the changes will be retained.

3. Methodological principles for estimating exports and imports of international services under the "Travel"

In accordance with the methodology of the balance of payments, the article "Travel" covers primarily the goods and services that are acquired in this country by visitors (non-residents in Kazakhstan, residents abroad) if their term of stay does not exceed one year. The amount recorded in the balance of payments under this article represents estimation of cost of expenses of visitors on acquisition of goods and services in the country of residence. This group doesn't include the transportation of passengers in international traffic (ticket price) which are accounted for in the article "Services: Passenger".

Exports/imports of services under the "Travel" are calculated as the product of the average expenditure on a single trip and the number of citizens of Kazakhstan exiting the country/number of foreign citizens entering Kazakhstan.

The Border Service of Kazakhstan National Security Committee provides the initial information on the number of the exiting/the entering by citizenship, purpose of travel and countries.

The average expenditure per travel estimation is based on following sources of information:

- norms established in Kazakhstan for expense reimbursement for business trips to foreign countries;
- norms of travel expenses of the employees from foreign countries on business trips to Kazakhstan;
- norms for the movement of goods for personal use;
- results of sample surveys conducted by Committee on Statistics of Ministry of National Economy of the Republic of Kazakhstan on expenditures of individuals entering Kazakhstan and expenditures of resident households abroad;
- information found on the internet from tour operators about tour pricing to foreign countries and to Kazakhstan.

Based on information extracted from these data sources average expenditure per travel trip by travel purpose (work, tourism, private), country, types of transport and length of stay is calculated.

These new estimated parameters for the calculation of the article "Travel" are applied from the 1st quarter of 2012.

4. Methodological principles for estimating "Personal transfers"

According to methodology of the balance of payments, "Personal transfers" consist of all current transfers made or received by resident households to or from nonresident households. Personal transfers thus include all current transfers between resident and nonresident individuals independently of the source of income of the sending household or the relationship between the households. So, although it is recognized that personal transfers will often originate from migrants sending resources to support their relatives in their economy of origin, personal transfers as defined in the balance of payments methodology are not limited to such activity.

"Personal transfers" article of the balance of payments of Kazakhstan is formed according to the banking statistics data on international money transfers of individuals by their residency,

sender/recipient country and purposes of transfer. At the same time bank statements do not contain information about the origin of these funds and the senders' citizenship. Taking into account the flow of funds as payments for purchased goods and services (considering country distribution of personal transfers) in the reporting data on non-repayable money transfers, estimates of the share of non-repayable workers' remittances of individuals in the total amount of personal transfers that are classified by senders as non-repayable are conducted. Thus, under this article the cross-border non-repayable transfers of individuals according to bank statistics data are taken into account with the estimates of the National Bank.

Methodological approaches to this estimation were updated according to the results of the anonymous survey of senders and recipients of transfers which was conducted with Kazakhstani banks' participation in late 2013 – early 2014. Based on the results of the survey new averaged coefficients to estimate the share of non-repayable transfers were obtained. These coefficients were estimated by countries, by direction (from Kazakhstan/to Kazakhstan), by methods (using a bank account and through international money transfer systems) and by volume (less than US\$ 10,000 or more).

New coefficients for the calculation of the article "Personal transfers" are applied from the 1st quarter of 2012.

5. Principles for calculating net inflows/outflows of capital by the private sector

Net inflows/outflows of capital include all transactions by the private sector registered in the financial account of the balance of payments, as well as errors and omissions.

The private sector includes all residents except for the Government of the Republic of Kazakhstan and the National Bank of Kazakhstan ("General government" and "Central bank" sectors in the balance of payments).

For the purposes of this table, net acquisition of assets recorded in the financial account of the balance of payments is shown with the opposite sign: an increase in assets is presented with a "minus" sign, whereas a decrease - with a "plus" sign. Accordingly, aggregates (Net inflows/outflows of capital, Banks, Other sectors, Transactions of the Government sector, Financial account (excluding reserve assets)) are also presented with the opposite sign to that used in the balance of payments. Thus, outflow of capital includes transactions related to an increase in external assets or a decrease in external liabilities in this table. Inflow of capital is provided by an increase in external liabilities or a decrease in external assets.

External assets include investments of residents in foreign stocks or debt securities, loans and credits granted by residents to nonresidents, receivables of residents from nonresidents, foreign currency belonging to residents, residents' accounts abroad and other assets.

External liabilities include investments of nonresidents in domestic stocks or debt securities, loans and credits granted by nonresidents to residents, payables of residents to nonresidents, nonresidents' accounts in domestic banks and other liabilities.

Assuming that the errors and omissions in the balance of payments are mainly formed by the non-bank private sector transactions, this item is included in the calculation of net inflows/outflows of capital from other sectors.

Appendix III.4

On transition to the new methodology of external sector statistics

Until 2013 the compilation of the external sector statistics of Kazakhstan was conducted in accordance with the International Monetary Fund (IMF), the Balance of Payments Manual, 1993, 5th edition (BPM5). Starting with the reports from the 1st quarter of 2013, the National Bank has made a transition to the new IMF methodology of the external sector statistics – the Balance of Payments Manual, 2009, 6th edition (BPM6) in order to comply with new international standards.

Conceptually, the BPM6 maintains continuity with the methodology of the previous edition (BPM5). Previous data on balance of payments statistics, based on the BPM5 recommendations, generally remain comparable with the aggregate data compiled according to the new methodology. Data conversion of the balance of payments, international investment position and external debt of Kazakhstan for the period 2005 to 2012 (incl.) has been implemented to achieve comparability of time series. The values of the balance of payments, international investment position and external debt accounts and their components for these periods changed since there was a rearrangement of individual items in the balance of payments.

The standard presentation of the balance of payments statistics, previously based on the use of credit (plus) and debit (negative) entries, has been modified for publication of data. The current account and capital account exclude the use of the "minus" sign while reflecting imports of goods and services as well as primary and secondary incomes payable. At the same time, the balance of relevant accounts (goods, services, primary income and secondary income) is defined as the difference between the credit and the debit.

In financial account, the terms "assets" and "liabilities" have been changed to "net acquisition of financial assets" and "net incurrence of liabilities". If there is an increase of assets or liabilities, it is shown with a "plus" sign; if there is a decrease in assets or liabilities, it's shown with a "minus" sign. The balancing item for the financial account is defined as the difference between assets and liabilities.

A brief summary of the changes in the BPM6 requirements compared with the BPM5 is given in the Appendix.

A detailed Methodology on international accounts (external sector statistics) developed on the basis of the BPM6 is available on the website of the National Bank of the Republic of Kazakhstan.

Because of the absence of direct investment data according to the directional principle (to Kazakhstan and abroad) in the standard presentation of the balance of payments and international investment position, additional analytical tables are provided:

- _) Direct investments on a directional basis: flows for the period – contains indicators of the net and gross inflows and outflows of the direct investments to and from Kazakhstan.
- _) Direct investments on a directional basis: position as of the end of the period.

Due to the changes in the presentation of the direct investments and the inclusion of transactions between fellow enterprises in its composition, the description of the indicators and the compilation methods for gross inflows and outflows of the direct investments have been clarified – direct investor's share capital buyback is excluded.

For the comparability of data, recalculation of time series on gross direct investment inflows to Kazakhstan from foreign direct investors and gross direct investment outflows from Kazakhstani direct investors abroad starting from the year 2005 has been completed.

Furthermore, the balance of payments and international investment position transactions and positions associated with foreign assets of the National Fund of the Republic of Kazakhstan have been moved to the "General government".

For compliance with the requirements of the BPM6, the structure of standard presentation of external debt of the country has been slightly changed, particularly:

-) “Other sectors” does not include intercompany lending, which is currently presented as an independent component in the external debt composition. As in the balance of payments and international investment position, the intercompany lending includes liabilities to foreign fellow enterprises.
-) Beginning with the 1st quarter of 2013, “Other liabilities” include instruments such as “Insurance and pension programs, standardized guarantees”.

A brief summary of changes in the BPM6 requirements compared with the BPM5
