Kazakhstan:
Balance of Payments and
External Debt

for the 1st half of 2015

November, 2015

This publication was prepared by the Balance of Payments, Currency Regulation and Statistics Department. It reflects the latest developments in the external sector of the Republic of Kazakhstan and provides statistical reports on the balance of payments, international investment position and external debt of the country, as well as analytical commentaries to these reports. Statistical reports are supplemented by detailed analytical tables describing the methodology of external sector statistics and data sources for compilation. A separate statistical annex presents the structure of stocks and flows of international investment by type of investment. It is published on quarterly basis (in January, April, July and October).

Adjustments to previously published historical data series are possible in case of the changes in accounting methodology of statistical data and (or) availability of additional information about foreign trade transactions. In accordance with the regulations, statistics of the external sector of the Republic of Kazakhstan is revised twice a year - during the compilation of reports on the balance of payments, international investment position and external debt for the half year and for the full year and covers the two years prior to the reporting year. Updated data are published annually in April and October.

The main source for clarification of data is the emergence of additional information received at the time of compilation of the reports – the data obtained in the framework of registration and notification of foreign currency transactions, the identification of statistical discrepancies in reconciliation of data with others, except for statistical reporting on the balance of payments, data sources, as well as clarification of official trade statistics.

Due to rounding of data in separate cases in the tables provided in this publication, there may be minor differences in the last digit between totals and sum.

The date of compilation of statistical data for this publication is September 30, 2015. The date of the last update of data for the period 2013-2014 is September 30, 2015.

Additional information about the presentation of statistical data can be obtained from the Balance of Payments, Currency Regulation and Statistics Department.

at the following address: 050040, Almaty, Koktem-3 micro district, 21
by email: altynay.kangeldiyeva@nationalbank.kz

Statistical reports on the balance of payments, international investment position and gross external debt in standard and analytic representations, as well as a methodological commentary on the compilation of these reports are available on the website of the National Bank of Kazakhstan: <http://www.nationalbank.kz>. The specified statistical reports are published on the NBK's website on the 90th day after the end of the reporting period and are available in Kazakh, Russian and English languages.

BALANCE OF PAYMENTS OF THE REPUBLIC OF KAZAKHSTAN for the first half of 2015

Current account

Continuing decrease of exports of goods and reduction of direct foreign investors' income against the background of adverse pricing conditions for commodities had a determinative impact on the current account of balance of payments in the first half of 2015.

The world price for Brent oil in the 1st half of 2015 averaged 58 dollars¹ per barrel as compared to 108.8 dollars per barrel in the base period². The contract prices for oil exports in January-June of the reporting period decreased to 440.7 dollars per ton as compared to the 815 dollars per ton in the base period.

On average, the export prices in the reporting period were 37.3% less than those in the base period. Along with less significant decrease in prices of products imported by Kazakhstan, the average index of trade terms, which is calculated as the ratio of the change in contract export prices to the change in contract import prices, during the period was 25.8% below the base period (Table 1).

Table 1
**Changes in the price indices and trade terms
(as a percentage compared to the same period of the previous year)**

	1Q 2014	2Q 2014	H1 2014	1Q 2015	2Q 2015	H1 2015
Export prices	-4,3	-4,6	-4,5	-34,1	-40,5	-37,3
Import prices	4,1	5,2	4,7	-19,0	-11,2	-15,1
Terms of trade	-8,1	-9,3	-8,7	-18,7	-33,0	-25,8
<i>including</i>						
<i>Eurozone countries</i>						
Export prices	-0,5	-6,4	-3,5	-41,1	-45,6	-43,3
Import prices	70,6	-36,5	17,1	-57,9	16,9	-20,5
Terms of trade	-41,7	47,3	2,8	39,9	-53,4	-6,8
<i>Russia</i>						
Export prices	-10,4	-3,2	-6,8	-22,5	-16,3	-19,4
Import prices	-5,4	-3,3	-4,4	-30,0	-22,9	-26,5
Terms of trade	-5,2	0,1	-2,6	10,7	8,6	9,6

In the analyzed period net export of goods in the amount of 7.9 billion dollars declined by 15 billion dollars compared to the base period. While negative balancing indicators persisted on other basic components of the current account, the deficit of international services balance decreased by 0.6 billion dollars, while primary income balance decreased by 5.2 billion dollars. Increase of negative imbalance was observed in transfer operations (secondary income) – by 0.3 billion dollars compared to the base period (Figure 1).

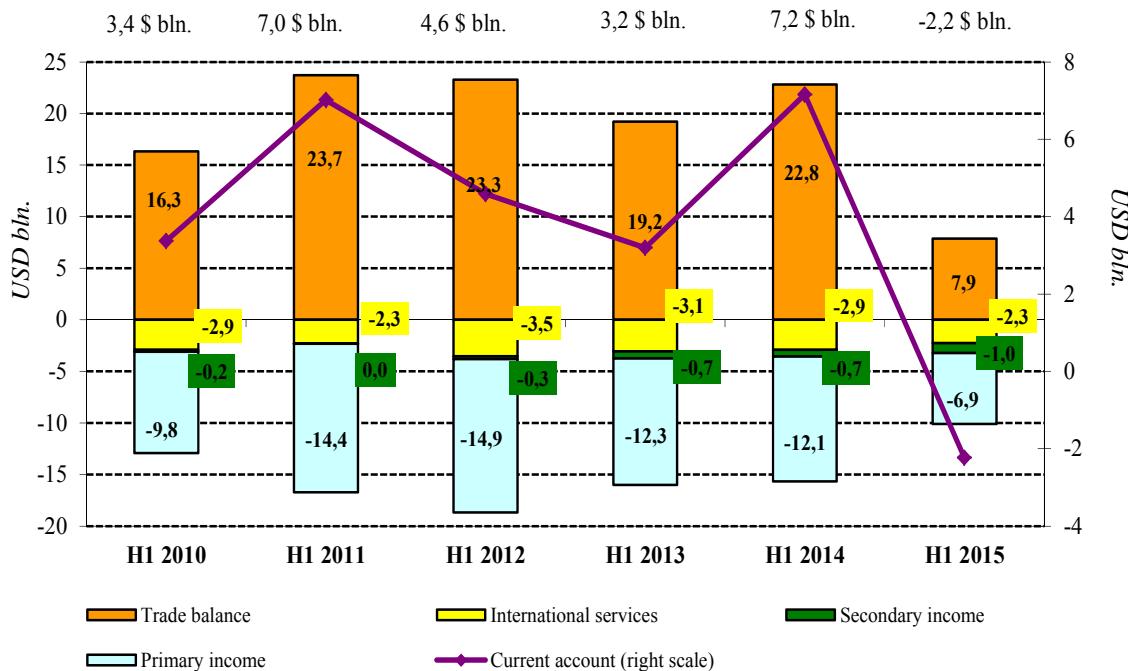

According to results of the reporting period, with the decline in exports of goods by 2.1% and significant decline in imports of goods by 17.8%, the positive imbalance of trading transactions grew by 17.4% to 22.6 billion dollars. At the same time, net outflow of resources on other components of the

¹ Here and hereinafter - US dollars

² Here and hereinafter the first half of 2015 is considered as a reporting period, and the first half of 2014 - as a base period

current account remained essentially unchanged, amounting to around 16 billion dollars. The positive balance of the current account of the balance of payments increased twice compared to the same period of 2013.

Figure 1. Current account

As a result, high current account surplus of the base period (7.2 billion dollars) changed to 2.2 billion dollars deficit in the first half of 2015, amounting to (-) 2.4 % in relation to GDP (8.0% to GDP in the first half of 2014).

External trade and trade balance

External trade turnover according to the balance of payments classification (including revisions of the official statistical data and adjustment from CIF import prices to FOB prices) for the first half of 2015 was about 42 billion dollars, which is 21 billion dollars less than that in the base period, where export of goods decreased by 18 billion dollars to 24.9 billion dollars and import of goods decreased by 3 billion dollars to 17.1 billion dollars.

The indicator of the openness of the economy as the ratio of trade turnover to GDP significantly decreased relative to the base period and amounted to 43.3%. The share of exports in GDP decreased by 21.7%, while imports decreased by 5.1% (Table 2).

Openness of the economy

(as a percentage of GDP)

	H1 2012	H1 2013	H1 2014	H1 2015
Export	51,9	45,5	48,2	26,6
Import	24,5	24,1	21,9	16,8
Trade turnover	76,4	69,6	70,1	43,3

Table 2

Export of goods registered by authorized bodies reached 24.5 billion dollars in the reporting period, which is 18 million dollars less than that in the base period. In the reporting half-year, the share of mineral products in official exports decreased by 7.7%, which led to decline in commodity export concentration ratio whose coefficient was 75.9% compared to 82.8% in the first half of 2014 (Table 3).

Table 3

**Commodity structure of exports of the Republic of Kazakhstan
(according to official statistics)**

Commodity group	H1 2014	H1 2015
<i>Value (in mln. of U.S. dollars)</i>		
All commodities	42 531,3	24 499,5
Main nomenclature, including	40 728,5	23 477,2
Mineral commodities	35 013,2	18 282,4
<i>Including oil and natural gas</i>	29 920,6	15 228,2
Ferrous metals	1 705,5	1 223,8
Nonferrous metals	1 879,8	2 027,2
Grain	652,7	380,7
Other commodities	1 802,8	1 022,3
<i>Ratio (in %)</i>		
All commodities	100	100
Main nomenclature, including	95,8	95,8
Mineral commodities	82,3	74,6
<i>Including oil and natural gas</i>	70,3	62,2
Ferrous metals	4,0	5,0
Nonferrous metals	4,4	8,3
Grain	1,5	1,6
Other commodities	4,2	4,2

Analysis of influence of price and quantity supplied factors on the value of official exports indicates that the decrease in total exports by 42% relative to the base period occurred at the expense of decreases of average contract prices by 40% and of the physical volumes by 5%, while growth of exports' value was recorded only in the group of nonferrous metals (Table 4).

Table 4

**Influence of price and physical volume changes on the value of exports
(First half year of 2015 compared that of 2014, according to official statistics)**

Commodity group	Export,		Change (increase (+), decrease (-))	Including, as a result of changes in	
	Millions of U.S. dollars	H1 2015		price	volume
All commodities	24 499,5	42 531,3	-42%	-40%	-5%
Main nomenclature	23 477,2	40 728,5	-42%	-38%	-7%
Mineral commodities	18 282,4	35 013,2	-48%	-44%	-7%
<i>of them oil and natural gas</i>	15 228,2	29 920,6	-49%	-46%	-6%
Ferrous metals	1 223,8	1 705,5	-28%	-17%	-13%
Nonferrous metals	2 027,2	1 879,8	8%	-7%	16%
Grain	380,7	652,7	-42%	-5%	-39%
Other commodities	1 022,3	1 802,8	-43%	-50%	23%

Decrease in the price component was recorded in all major commodity groups of exports. The largest decrease in contract prices was recorded in mineral products and finished products (other commodities).

Accumulation of physical volumes was recorded only in nonferrous metals and other commodities. Physical oil supplies decreased by 5.8% (2.1 million dollars) and amounted to 33.9 million tons.

The average world price for wheat, which prevails in grain commodity group, decreased from 309.6 dollars per ton in the base period to 227.5 dollars per ton in the reporting period. The contract price for wheat exports decreased by 7.2%, amounting to 216.9 dollars per ton.

The significant reduction in exports of ferrous metals by 481.7 million dollars (28%) was due to both price component and physical supplies. Contract price for ferroalloys and for rolling ferrous metals decreased by 14% and 15%, respectively. Decline of physical volumes by 22.5% for ferroalloys and by 9% for rolling ferrous metals was recorded.

Increase of nonferrous metals exports by 147.4 million dollars (8%) was caused by export growth of refined copper by 133.4 million dollars due to the increase of physical supplies by 33.4% up to 165.3 thousand tons and export growth of aluminum by 19 million dollars (11%) due to contract price increase by 14.2 % up to 5800.6 dollars per ton.

Besides aluminum, zinc's contract price increased by 7.4%. Export price for silver decreased by 18%, gold by 4%, copper by 13% and lead by 2%. World markets also indicate declines in the prices for silver, gold, copper and lead by 17%, 7%, 14% and 11%, respectively and increase in the prices for aluminum and zinc by 2% and 4%, respectively.

In the geographical structure of Kazakhstan's exports, the European countries retain the first place with a 61.3% share of the officially recorded exports (in the base period – 63.1%). The Asian region takes the second place - 22.4%, the share of the CIS countries increased to 16.1% compared with 12.7% in the first half of the previous year. In export distribution by country, the first place is occupied by Italy and China with 17.5% and 11.8% shares of total exports, followed by the Netherlands (11.5%). The share of Russia in total exports increased from 7.5% to 9.5%.

According to official statistics data of authorized bodies, *imports of goods* for the reporting period totaled about 15.5 billion dollars, which is 19.6% lower than that in the base period. Commodity import concentration factor changed insignificantly, reaching 36.6% against 35.4% in the base period (Table 5).

Table 5

**Commodity structure of imports of the Republic of Kazakhstan
(imports in CIF prices according to official statistics)**

Commodity group	H1 2013	H1 2014
<i>Value (in mln. U.S. dollars)</i>		
All commodities	19 278,6	15 494,7
Consumer goods	5 811,4	4 250,6
Food products	1 797,3	1 577,7
Non-food products	4 014,2	2 673,0
Intermediate consumption of manufactured goods	5 915,6	5 246,8
Investment goods	7 132,4	5 685,7
Other goods	419,1	311,5
<i>Ratio (in %)</i>		
All commodities	100	100
Consumer goods	30,1	27,4
Food products	9,3	10,2
Non-food products	20,8	17,3
Intermediate consumption of manufactured goods	30,7	33,9
Investments goods	37,0	36,7
Other goods	2,2	2,0

In the structure of imports the largest reduction occurred in consumer goods group (by 1.6 billion dollars) and investment goods (by 1.4 billion dollars). Investment goods' import retains the primacy in share of total import volumes. The decline of investment goods was mainly due to decrease of imports in railway locomotives by 175.9 million dollars (by 99.3%) to 1.1 million dollars, computers by 136.8 million dollars (46%) to 160.4 million dollars, railway wagons by 136.7 million dollars (74.6%) to 46.4 million dollars, helicopters by 130.7 million dollars (42.4%) to 177.2 million dollars.

With unit weight increase by 3.2%, intermediate consumption of manufactured goods, as previously, take the second place in total imports. In intermediate goods nomenclature the imports of which decreased by 0.6 billion dollars, the import of pipes for oil and gas pipelines declined by 111.1 million dollars (29.6%) to 264 million dollars, of oil and gas condensate by 80 million dollars (88.7%), of gasoline by 69.2 million dollars (13%).

Reduction of consumer non-food imports by 1.3 billion dollars (33.4%) was due to decline of automobile imports by 706.5 million dollars (58.8%) to 494.6 million dollars and medicine by 88 million dollars (16%) to 454.8 million dollars.

Total import declined in the reporting period exclusively due to contract price decrease by 27% despite the growth of physical volumes. Decline in the imports value and price components was registered on all commodity groups, while decrease in physical volumes was recorded only in group of other goods (Table 6).

Table 6

**Influence of price and physical volume changes on the value of imports
(First half year of 2015 compared with that of 2014, according to official statistics)**

Commodity group	Import		Change (increase (+), decrease (-))	Including, as a result of changes in	
	H1 2015	H1 2014		Price	Volume
All commodities	15 494,7	19 278,6	-20%	-27%	10%
Consumer goods	4 250,6	5 811,4	-27%	-29%	3%
Food products	1 577,7	1 797,3	-12%	-17%	5%
Non-food products	2 673,0	4 014,2	-33%	-35%	2%
Intermediate consumption of manufactured goods	5 246,8	5 915,6	-11%	-22%	13%
Investments goods	5 685,7	7 132,4	-20%	-30%	13%
Other goods	311,5	419,1	-26%	-11%	-17%

In geographical structure of imports, the CIS countries preserved the leadership position with 42.4% of total imports in the reporting half-year, where the Russian Federation accounted for 33.7%. Asia took the second place with 27.5%, of which 17.1% came from China. The import share of Europe amounted to 22.3%.

According to custom statistics, the trade turnover with countries of the euro area decreased by 42.6% in the reporting period, while exports decreased by 46.4%. With the decline of imports by 17.3%, net exports of goods in the countries of the euro area totaled 9 billion dollars decreased by 51.5% in comparison with the base period.

In trade with the **Russian Federation** with a drop in imports (by 1.1 billion dollars) and in exports (by 0.8 billion dollars), negative imbalance of trade transactions decreased by 0.2 billion dollars and amounted to 2.8 billion dollars. In the reporting period the foreign trade turnover with Russia decreased by 20.7% to 7.5 billion dollars.

Adjustments on coverage. Trade turnover of transactions by individuals unregistered in official statistics ("shuttle" trade) for the reporting half-year is estimated at 2.6 billion dollars, including the value of goods exported from Kazakhstan that amounted to 366.7 million dollars and imported goods – to more than 2.2 billion dollars. The negative balance of these transactions increased to 1.8 billion dollars compared with 1.3 billion dollars in the base period.

Based on the information of customs authorities on the import of cars by individuals for personal use with registration of Customs Payment Order (CPO) and data of the partner countries on the supply of natural gas, adjustments to the value of official imports were introduced for the reporting period in the amount of 5.2 million dollars and 23.4 million dollars, respectively.

According to the reported data of transport enterprises, the cost of purchasing fuel and food abroad (imports) exceeded 25.8 million dollars. Similarly, the cost of nonresidents' transportation companies in Kazakhstan (exports) amounted to 52.9 million dollars.

Due to the reflection of goods that are not subject to recording in the official imports according to the methodological standards of international trade statistics, the downward adjustment to official imports was made in the amount of 2.3 million dollars.

As a result of adjustments on coverage, on classification (adjustment from CIF import prices to FOB prices) and on the cost of goods purchased by transport organizations in ports, the trade surplus for the first half of 2015 amounted to 7.9 billion dollars, decreasing by 65.6% as compared to the base period.

The balance of international services

In the reporting half year during the decline in exports as well as imports of services, the balance of international services amounted to about 8.3 billion dollars, which is 7.6% less than that in the base period. A more significant reduction in imports of services resulted in the decline of the deficit balance of international services by 22.1% to 2.3 billion dollars.

Export of services during the reporting period exceeded 3.0 billion dollars; its decrease by 0.7% relative to the base period was mainly related to the decline of transport services rendered to nonresidents. In the structure of the main export of services, revenue from nonresidents for the transport of goods decreased by 5.0.

Import of services was formed in the amount of 5.3 billion dollars in the reporting period. Significant decrease in nonresident construction services (by 25.5%), transport (23%) and other business services (14.8%) had a determining influence on the decrease of total volume of imported services by 11.1% relative to the base period (Table 7).

Table 7
Components of the international services balance
(First half year of 2014 compared with that of 2013)

in millions of U. S. dollars

	Export		Change (increase (+), decrease (-))	Import		Change (increase (+), decrease (-))
	H1 2014	H1 2015		H1 2014	H1 2015	
TOTAL	3 045,80	3 025,39	-0,7%	5 970,42	5 305,10	-11,1%
Manufacturing services on physical inputs	1,30	10,49	7,0 pa3	11,03	8,41	-23,8%

Transport	1877,70	1755,15	-6,5%	1156,54	890,48	-23,0%
Tourism (travel)	665,19	701,36	5,4%	830,01	960,18	15,7%
Construction	17,88	46,14	1,6 pa3	765,22	569,98	-25,5%
Insurance and pension services	34,93	37,32	6,8%	29,97	30,92	3,2%
Financial services	10,22	12,98	27,0%	50,02	60,77	21,5%
Telecommunications, computer, and information services	68,77	69,36	0,9%	146,34	168,35	15,0%
Charges for the use of intellectual property	0,21	0,27	28,6%	72,39	73,90	2,1%
Other business services	243,66	236,24	-3,0%	2697,24	2299,04	-14,8%
Personal, cultural, and recreational services	0,56	0,73	31,1%	39,17	36,57	-6,6%
Government services	108,46	129,70	19,6%	94,55	107,98	14,2%

In the geographical structure of international trade in services of Kazakhstan, the CIS countries accounted for 33.9% of foreign trade in services in the reporting period, the share of European and Asian countries were 24.7% and 22.3%, respectively. The main consumers of Kazakhstan's services were the

Russian Federation – 31.0% of total exports, China (27.1%), Uzbekistan (7.5%), Kyrgyzstan (3.5%), the UK and Germany (2.7%).

In the country-specific structure of import of services, the leading position was also occupied by the Russian Federation (16.6%) of the total imports, followed by the UK (9.2%), Italy (5.8%), Turkey (4.9%), South Korea (4.2%), China (3.6%), the Netherlands (3.1%) and Germany (2.3%).

Balance of primary income

During the reporting period, the negative balance of primary income was formed in the amount of 6.9 billion dollars, decreasing relative to the same indicator in the first half of 2014 by 1.8 times. At the same time, income receivable from nonresidents for providing labor and capital services decreased insignificantly by 2.6% to 1.0 billion dollars, and income payable to nonresidents decreased by 39.9% to 7.9 billion dollars.

Compensation of employees. Negative imbalance of compensation of employees in the reporting period amounted to 869 million dollars, insignificantly decreasing by 0.6% relative to the base period. Compensation of employees working abroad and citizens of Kazakhstan employed in foreign embassies and representative offices of international organizations in the country is estimated at 1.9 million dollars. The income of foreign citizens working in Kazakhstan decreased slightly by 0.6%, while the compensation of nonresidents hired by Kazakhstan's enterprises decreased by 1.9% and amounted to 377 million dollars. The salary estimate of informally employed labor immigrants from the CIS countries was 492 million dollars.

Investment income. The deficit of the balance of investment income totaled 6.1 billion dollars against 11.3 billion dollars in the base period (Table 8).

Balance of investment income	-13941,0	-11481,4	-11273,4	-6060,9

Income of the *National Bank of Kazakhstan* from international reserves and other foreign currency assets in the reporting period amounted to 88.5 million dollars. Income (net) of the Government of the Republic of Kazakhstan in the amount of 388.8 million dollars mainly from the funds of the National Fund of the Republic of Kazakhstan invested in foreign assets (457.6 million dollars) decreased by 26.4% relative to the base period (Table 9).

other income receivable	141,0	160,7	140,7	111,4
other income payable	1163,5	1113,0	1202,4	1128,0

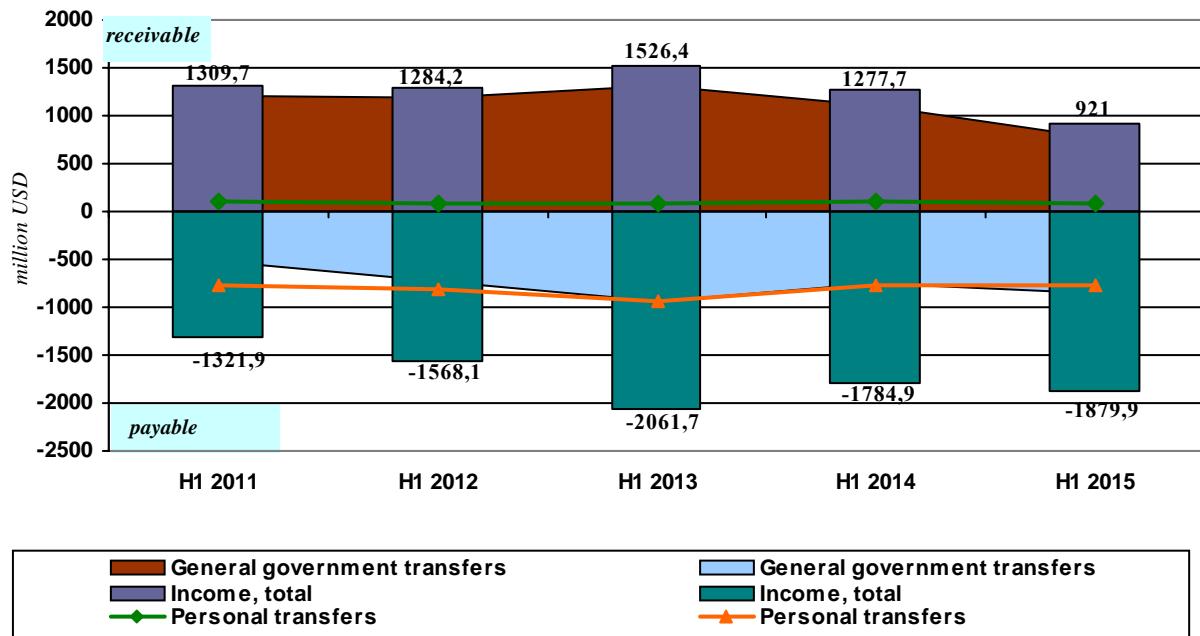

Income payable in the *banking sector* amounted to 452.0 million dollars (519.5 million dollars in the base period). Payments of interest on financial investments attracted by banks decreased by 3.5% to 290.2 million dollars, where 173.3 million dollars accrued on debt securities issued by Kazakhstan's banks, and 64.4 million dollars were spent on servicing of loans.

On transactions of *other sectors* negative imbalance amounted to 6.3 billion dollars, decreasing by 45.6% relative to the base period. The net income of nonresident creditors who are not in direct investment relationship decreased by 4.2% to 1.0 billion dollars, and net income of nonresidents on transactions of direct investment decreased by 49.8% to 5.3 billion dollars.

Secondary income

The deficit in the secondary income in the reporting period amounted to 958.9 million dollars, increasing by 45% compared with the base period. Overall, income payable to nonresidents increased by 5.3% to 1.9 billion dollars, while its volumes, received from nonresidents, decreased by 18% and amounted to 921 million dollars (Figure 2).

Figure 2. Dynamics of main components of secondary income balance

Income of general government. The positive imbalance of general government transfer transactions of 192.7 million dollars in the base period changed to negative imbalance in the amount of 85.8 million dollars in the reporting period, which is firstly related to reflection of the cost of oil supply to Russia as a compensation of uncollected income of the Russian Federation budget through customs free supply of oil products to Kazakhstan.

Income of other sectors. The negative imbalance of transfer transactions of other sectors increased insignificantly (by 2.2%) to 873.1 million dollars mainly due to the increase of the negative balance of current transfers between individuals by 3.6% to 692.4 million dollars (668.3 million dollars in the base period).

Gratuitous transfers of individuals received from abroad during the reporting period decreased by 13.5% to 87.5 million dollars relative to the base period and personal transfers sent from Kazakhstan increased by 1.4% to 779.9 million dollars.

On transfer transactions by individuals transfers sent abroad considerably exceed the amounts received from abroad by all major counterparty-countries.

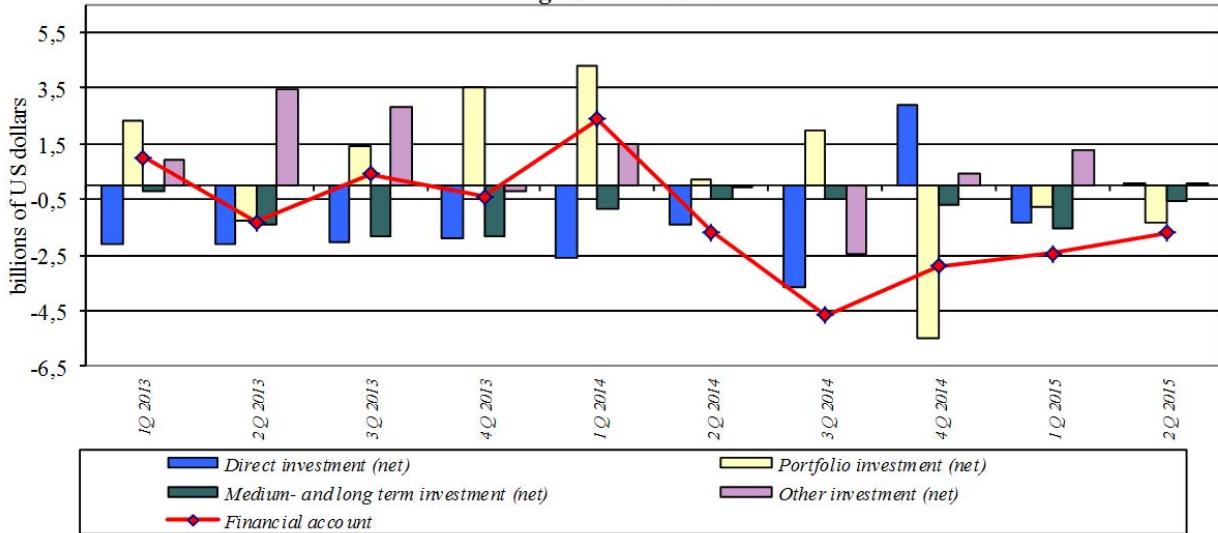

The largest amount of funds is sent, as in previous periods, to the Russian Federation (371.9 million dollars or 47.7% of total sent transfers during the reporting period) followed by Turkey (95.1 million dollars), China (78.2 million dollars) and Uzbekistan (73.8 million dollars). The most significant amounts of personal transfers came from the Russian Federation – 31.5 million dollars or 36% of total transfers of individuals into the country, the United States – 12.8 million dollars or 14.6%, and Germany – 8.1 million dollars or 9.2%.

Financial account

In the reporting period, in financial transactions account (excluding transactions with reserve assets of the National Bank), there was a negative balance of 4.1 billion dollars (positive balance of 0.7 billion dollars in the base period) as a result of higher rate of reduction of assets in comparison with reduction of liabilities. Thus, on financial transactions net inflow of capital or “net borrowing from other countries” was formed.

Figure 3 shows the dynamics of the state of the financial account with the breakdown by instruments in its structure.

Figure 3. Financial account

In the reporting period, net inflow to the country was ensured by decreasing foreign assets of National Fund of the Republic of Kazakhstan, which is reflected in *General government* sector and foreign assets of Kazakhstani banks also due to reduction of liabilities to nonresidents of mostly banks and general government (Table 10).

Direct investment

Foreign direct investment (FDI) as a result of outstripped growth of liabilities over assets formed a negative imbalance of 1.3 billion dollars (4.0 billion dollars in the base period).

Net growth of financial assets on FDI of 2.0 billion dollars (reduction by 0.3 billion dollars in the base period) is mainly associated with issuance of loans to foreign direct investors by Kazakhstani enterprises.

Net incurrence (growth) of liabilities on FDI in the amount of 3.3 billion dollars (3.7 billion dollars in the base period) was due to increase in intercompany lending of Kazakhstan's enterprises from their foreign parent companies and reinvestment of earnings (retained earnings) in the total amount of 2.7 billion dollars.

Gross inflows of FDI to Kazakhstan³ according to the directional principle of direct investment amounted to 7.5 billion dollars in the reporting period (12.3 billion dollars in the base period). Inflow of FDI to *mining of crude oil and natural gas* reduced by 67.7% and amounted to 1.5 billion dollars, in *activities of geological exploration and research* - by 29.1% to 2.1 billion dollars, in *wholesale and retail trade, repair of motor transport* - by 38.1% to 1.0 billion dollars, in activity of *manufacture of basic metals and fabricated metal products except machinery and equipment* by 21.3% to 0.9 billion dollars. Inflow of FDI in *financial service activities except insurance and pension funding* increased by 22.6% and amounted to 0.4 billion dollars.

In the structure of gross inflows of foreign direct investment by countries the first place belongs to the Netherlands (28.6% from gross inflow of FDI), then followed by the USA (14.9%), Switzerland (11.4%), the Russian Federation (7.7%), France (5.1%), the United Kingdom (4.9%), Germany (3.4%), China (3.2%), Belgium and Italy (each 3.1%) and South Korea (3.0%).

Portfolio investment and financial derivative investments

The balance on *portfolio investment* was formed with a negative balance of 2.1 billion dollars (positive balance of 4.6 billion dollars in the base period) due to higher rate of growth of assets over growth of liabilities in portfolio investment.

Net acquisition of financial assets on portfolio investment was formed with a negative balance of 4.8 billion dollars, which is due to reduction of foreign assets of the National Fund of the Republic of Kazakhstan by 4.1 billion dollars, also with the decrease of foreign assets of Kazakhstani banks by 0.7 billion dollars (Table 11).

³ It includes additions to the share capital of the Kazakhstani subsidiaries, reinvested earnings and debt financing raised from foreign parent companies without repayment.

Balance of portfolio investments	9130,5	1097,3	4553,2	-2138,2

Net incurrence of liabilities on portfolio investment formed in the reporting period with a negative balance of 2.6 billion dollars (2.0 billion dollars in the base period) mainly due to transactions of non-banking organizations to repay debt securities previously issued in foreign markets. Negative balance on transactions with *derivative financial instruments* amounted to 79.2 million dollars (surplus of 72.6 million dollars in the base period). In the reporting period, transactions with derivative instruments were mainly conducted by Kazakhstani banks as well as with foreign assets of National Fund of the Republic of Kazakhstan.

Other investment

On transactions recorded under *Other investment* in the reporting period there was a negative imbalance of 648.0 million dollars (surplus of 79.9 million dollars in the base period) due to higher rate of decrease of residents' assets (by 1.8 billion dollars) in comparison with decrease of liabilities (by 1.1 billion dollars).

On *medium and long - term investment* increase of liabilities by 347.3 million dollars was registered due to growth of liabilities of banks and non-banking sector enterprises on loans (Table 12).

On **short-term investment** decrease of liabilities by 1.5 billion dollars was due to decrease of assets of nonresidents on accounts of the National Bank of Kazakhstan and Kazakhstani banks, reduction of accounts payable of non-banking sector enterprises and also due to repayment of loans of short-term liabilities to nonresidents by banks and non-banking organizations.

Financial assets under *Other investment* in the reporting period decreased by 1.8 billion dollars. Asset reduction was mainly due to repayment of nonresidents' liabilities (preferably long-term) on loans to Kazakhstani banks and non-banking organizations, also reduction of assets of the National Fund of Kazakhstan and non-banking organizations on accounts in foreign banks. However, the National Bank of Kazakhstan's assessment of non-classified in BOP transactions by individuals with foreign currency (reflected in Other sectors) partially compensated for the reduction of long term assets in *Other investment* (Table 13).

Net acquisition of financial assets, total	722,1	5008,0	2111,1	-1789,5

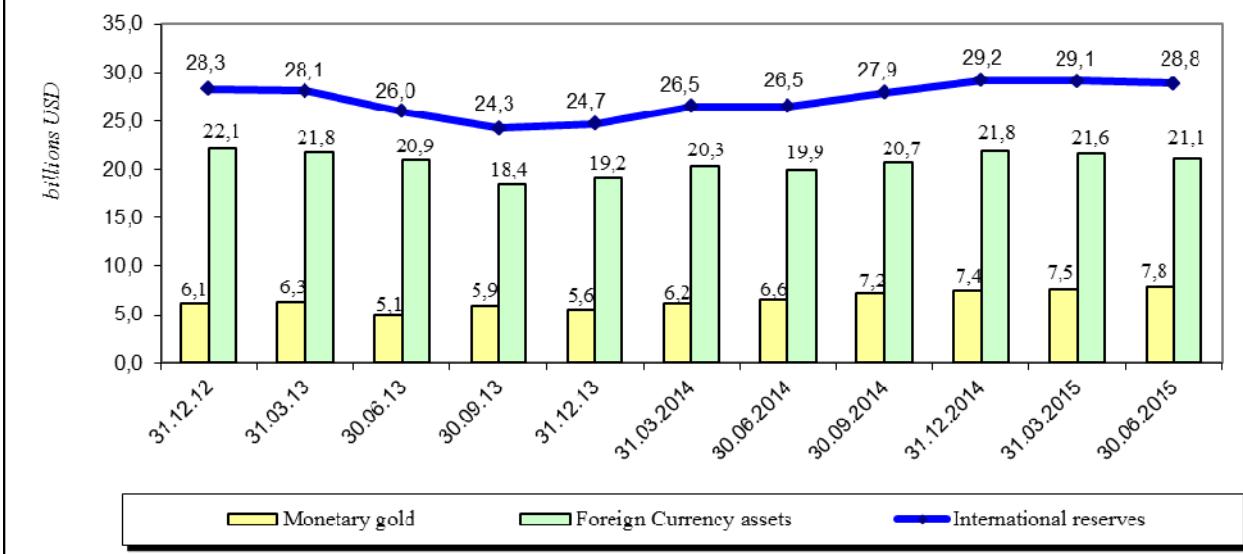

Net outflow of capital by the private sector, including transactions of the private sector registered in financial account as well as errors and omissions of balance of payments, significantly increased in comparison with the base period and is assessed for the reporting period at 2.0 billion dollars (net outflow 0.8 billion dollars for the first half of 2014). Calculations are shown in Appendix I.14.

Reserve assets

International reserves of the National Bank decreased during the reporting period by 0.1 billion dollars as a result of transactions. The decrease in reserve assets was mainly due to the transactions in domestic currency market by 0.6 billion dollars in the second quarter of the reporting period; at the same time, reserve assets increased by 0.5 billion dollars in the first quarter.

Besides transactions of the National bank, the change in the level of reserve assets is affected by changes in exchange rate and cost, which are not reflected in balance of payments. As of 30 june 2015, international reserves (without assets of the National fund) amounted to 28.8 billion dollars, which cover 6.6 months of Kazakhstani goods and services import.

Figure 4. Dynamics of the international reserves of the National Bank of the Republic of Kazakhstan

As of 30 June 2015, the share of monetary gold in total volume of international reserve amounted to 26.9% or 7.8 billion dollars (on 31 December 2014 – 25.3% or 7.4 billion dollars), currency assets – 73.1% or 21.1 billion dollars (on 31 December 2014 – 74.7% or 21.8% billion dollars).

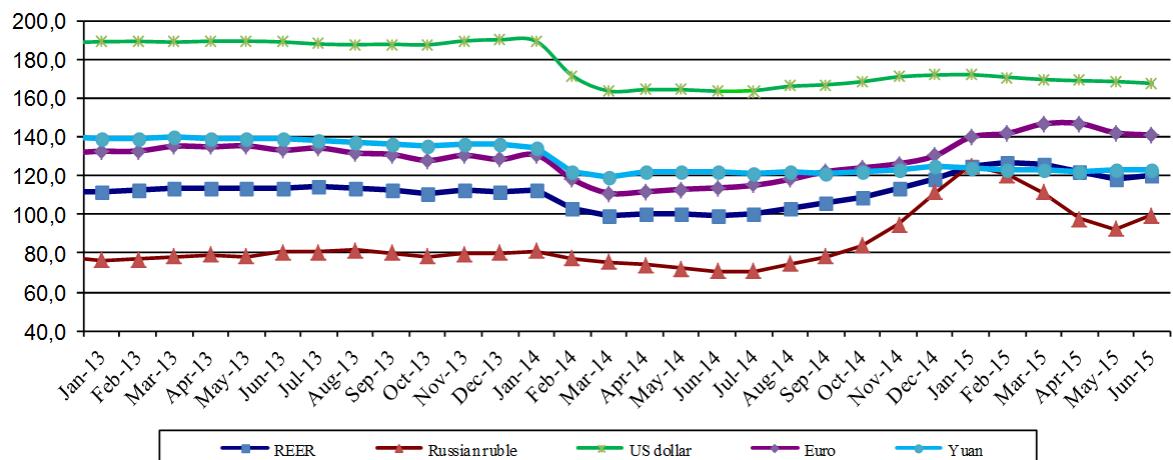

Dynamics of the real effective exchange rate

During the first half of 2015, dynamics of the real effective exchange rate (REER) index of tenge formed under influence of outstripped depreciation of main trade partners' national currencies. Thus, in January –February significant depreciation of Russian ruble put pressure on REER index, while in March - April tenge continued to appreciate in real terms under pressure of significant depreciation of euro due to the program of Quantitative Easing by ECB to buy government securities.

As a result of the first half of 2015, REER index increased by 1.2% relative to December 2014 and amounted to 120.1% relative to the December 2000 baseline. As a result, REER index calculated against a basket of currencies of the CIS countries decreased by 8.5% in June 2015 compared to December 2014 and REER index against other countries' currencies increased by 4.3%.

Dynamics of bilateral real exchange rate (RER) of tenge against the currencies of major trade partners showed a volatile trend. Thus, in June 2015 compared with December 2014 RER tenge to ruble weakened by 10.9%, dollar -2.5%, yuan – 1.3%, while the euro strengthened by 8.3% (Figure 5).

INTERNATIONAL INVESTMENT POSITION OF THE REPUBLIC OF KAZAKHSTAN as of June 30th, 2015

From the 1st quarter of 2013, Kazakhstan's balance of payments is compiled in accordance with the sixth edition of "Balance of Payments and International Investment Position Manual" (BPM6). The main methodological changes are stated in the press release of the National Bank No.25, which is available on the following webpage: <http://www.nationalbank.kz/?docid=26>.

IIP presents the difference between accumulated stocks of country's foreign financial assets and liabilities. It reflects changes that happened during the period, such as: changes attributable to transactions - as a result of transactions in different financial instruments (that fully correspond to the financial account of the Balance of Payments); valuation changes – caused by exchange rate and price fluctuations of financial instruments; other changes – as a result of revision of transactions' classification, write-offs of bad debts, different coverage of respondents, etc.

Attachment II provides data on direct investment compiled according to the directional principle in accordance with BPM6 and the 4th Edition of «Benchmark Definition of Foreign Direct Investment».

During the 2nd quarter of 2015, **International Investment Position (IIP) of Kazakhstan** worsened (decreased) by 1.9 billion US dollars (further – billion USD) and as of June 30th, 2015 IIP amounted to (-) 39.8 billion USD. Deterioration (decline) of IIP is associated with a significant decrease of the country's external assets, while external liabilities stayed at the same level. (Diagram 1, Attachment 1).

The country's external assets during the reporting quarter decreased by 1.9 billion USD, amounting as of the end of June of 2015 to 170.9 billion USD. All changes during the reporting period were significant, including valuation changes (mainly assets of the National Fund of Kazakhstan (further – NFK)) and other corrections (that include valuation of individual's operations – acquisitions of certain foreign assets¹) (Table 1). The country's external liabilities stayed at the same level and amounted to 210.8 billion USD.

¹ Due to non-availability of information on stocks of individuals' external assets of financial instruments (that are referred to Other sectors), flows of indicators, such as "direct investment" (referring to real estate abroad), «currency and deposits» (money on the accounts in foreign banks), and «other accounts receivable» (currency on hands), that correspond to the financial account of the balance of payment, are written off as other changes.

Table 1. Operational and non-operational changes of IIP of Kazakhstan

billion USD

		IIP, as of 31/03/15	IIP changes during the 2 nd quarter of 2015			IIP, as of 30/06/15
			operational	valuation	other	
External assets of Kazakhstan	(1)	172.9	-2.3	1.3	-1.0	170.9
External liabilities of Kazakhstan	(2)	210.8	0.1	0.1	-0.2	210.8
IIP of Kazakhstan	(3=1-2)	-37.9	-2.3	1.1	-0.7	-39.8
including debt instruments	(4)	-28.5	-3.3	0.3	-0.5	-32.0
<i>Net external debt of Kazakhstan</i>	(5=-4)	28.5	3.3	-0.3	0.5	32.0

The IIP of debt instruments² continues to be negative ((-)32.0 billion USD) as of June 30th, 2015, that characterizes the country as a “net borrower.” Kazakhstan’s net external debt³, which represents IIP of debt instruments with the opposite sign, amounted to 32.0 billion USD, increasing during the reporting quarter by 3.4 billion USD.

In the breakdown of IIP by Kazakhstan’s economic sectors, the Central bank (the National Bank of Kazakhstan) and General government are characterized as “net lenders”; in other words, external assets of these sectors exceed external liabilities, including debt instruments (Attachment 2). On the other hand, Banks sector (Deposit-taking corporations, except the central bank) is now characterized as “net borrower”.

A significant decrease of external assets of Banks sector is associated with the recognition of BTA Bank as a legal entity that is not a bank. Therefore, for statistical purposes its external assets and liabilities were reclassified as assets and liabilities of Other sectors. As a result, net external debt of Banks (Deposit-taking corporations, except the central bank) increased during the reporting quarter by 10.1 billion USD and as of June 30th, 2015 amounted to 1.5 billion USD.

Due to an aforementioned reason, external assets of Other sectors⁴ significantly increased, but the sector remains to be a “net borrower.” During the 2nd quarter of 2015, its net external debt decreased by 9.1 billion USD, amounting as of the reporting date to 100.5 billion USD. External liabilities of Other sectors amounted to 190.7 billion USD or 90% of country’s external liabilities and exceeded external assets by 128.3 billion USD.

The NFK accounts for a significant share of external assets of general government, which as of June 30th, 2015 amounted to 68.3 billion USD or 40% of the country’s external assets; while reserve assets account for a major part of external assets of the central bank: 28.8 billion USD or 17% of country’s external assets. Composition of NFK and reserve assets of the National Bank of Kazakhstan (NBK)⁵ is presented in Diagram 2.

² Debt instruments include currency and deposits, debt securities, loans, insurance, pension, and standardized guarantee schemes, trade credits and advances, special drawing rights, other accounts receivable and accounts payable.

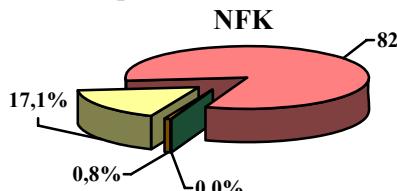

³ More details on external debt can be found in an analytical report “External Debt of Kazakhstan.”

⁴ In the composition of the IIP, Other sectors also include assets/liabilities, bound by direct investment relationship, while in the statistics of external debt, liabilities of direct investment (i.e. intercompany lending) are in a separate category.

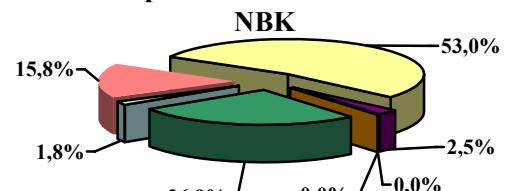

⁵ Composition of foreign assets of NFK and reserve assets of the National Bank of Kazakhstan in statistics of the IIP can be slightly different from the composition in other sources due to the specificity of accounting of financial derivatives in the composition of those assets according to BPM6.

The IIP breakdown by types of financial instruments is presented in Diagram 3. As before, a major share of external assets consisted of nonresidents' debt securities; mainly, in portfolios of the NFK and reserve assets of the NBK. Loans represent a major part of external liabilities and debt securities in nonresidents' portfolio.

The IIP by partner economy can help to identify overreliance of Kazakhstan's economy on another economy, and hence potential vulnerability and contagion concerns (Diagram 4).

Diagram 4. IIP of Kazakhstan by countries, as of 30/06/2015

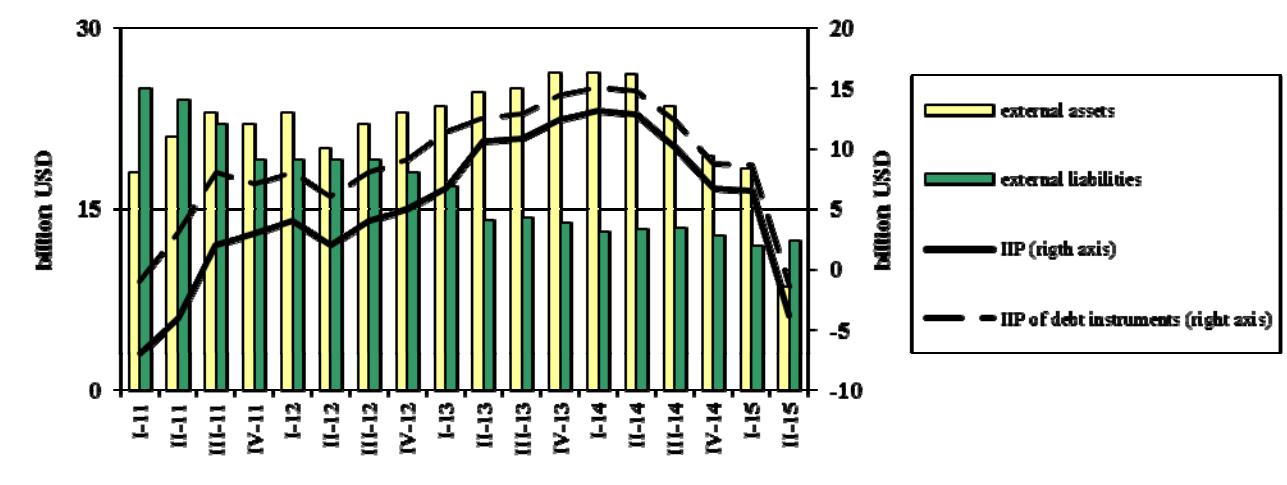

In the IIP by partner economy, as of the reporting date Kazakhstan has a positive investment position (excess of assets over liabilities) in a relation to such countries as the USA, Germany, the Seychelles, and other countries, while it has a negative investment position (excess of liabilities over assets) in a relation to the Netherlands, China, the United Kingdom, and France (Attachment 5).

Investment position of Banks sector

The investment position of Banks (deposit-taking corporations, except the central bank) worsened in the 2nd quarter of 2015 (Diagram 5).

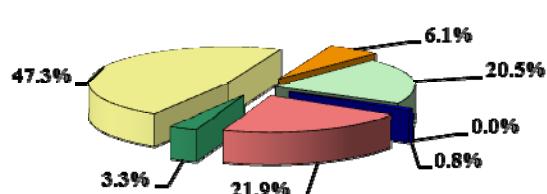

Diagram 5. IIP of Banks sector, as of the end of the period

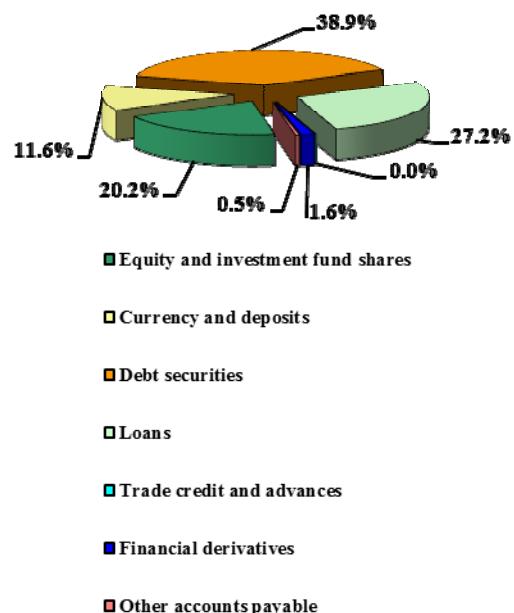

As of June 30th, 2015 the investment position of Banks (deposit-taking corporations, except the central bank) amounted to (-)3.8 billion USD, external assets – 8.6 billion USD (5% of external assets of Kazakhstan), decreasing during the reporting period by 9.8 billion USD due to a change of economic sector of BTA Bank (Diagram 6).

Diagram 6. IIP of Banks sector by types of financial instruments, as of 30/06/2015

a. Composition of external assets

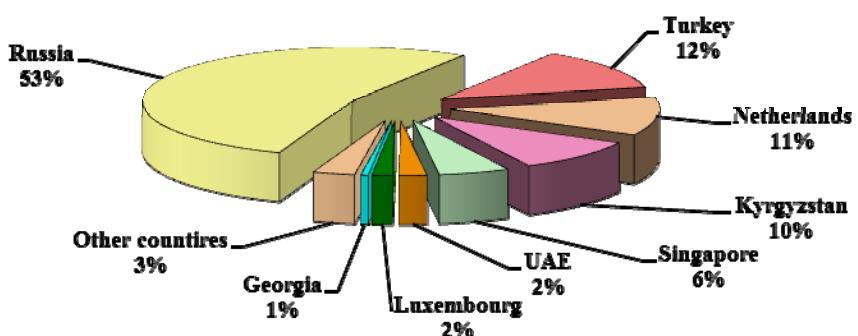

b. Composition of external liabilities

Overall, as of the end of the reporting period, loan indebtedness of nonresidents to Banks (Deposit-taking corporations, except the Central bank) amounted to 1.8 billion USD (21% of Banks' external assets). It is important to note an improvement of Banks' portfolio in which arrears equaled 136.2 million USD and a predominant share of which was due to the Russian Federation (Diagram 7, Attachment 3).

Volume of foreign currency in Banks (Deposit-taking corporations, except the Central bank) decreased by 95.1 million USD, amounting as of the end of June of the current year to 1 billion USD (12% of Banks' external assets).

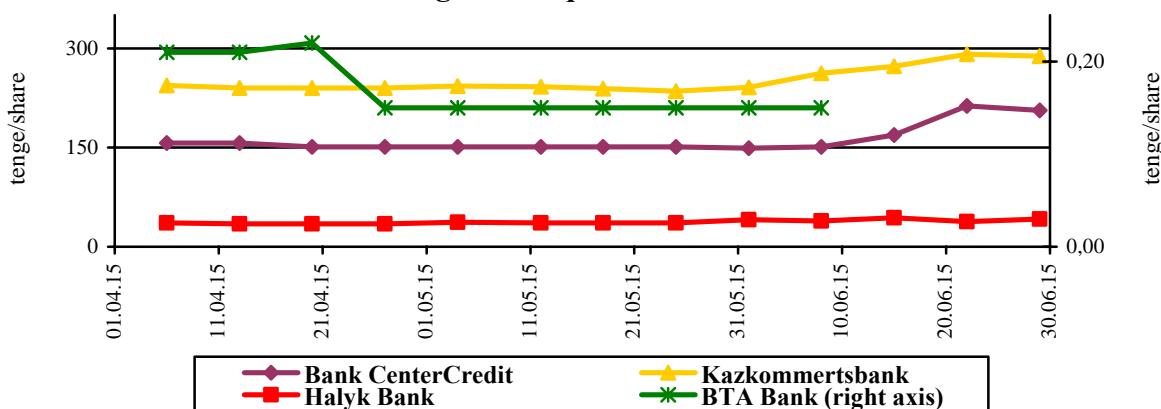

Diagram 7. Total loan indebtedness of nonresidents to Banks, as of 30/06/2015

As of June 30, 2015 external liabilities of Banks equaled 12.4 billion USD (6% of external liabilities of Kazakhstan), increasing during the reporting period by 452.7 million USD. The largest share (39%) of external liabilities fell on debt securities of Banks (mainly – Eurobonds), held by nonresidents.

An increase of external liabilities of Banks in the reporting period is caused by an increase of loans and by an increase of market value of both debt securities and Banks' common shares (Diagram 8). As of the reporting date, total equity capital of nonresidents in the capital of Banks taking in consideration secondary market is estimated at 2.5 billion USD, increasing during the reporting quarter by 114.4 million USD.

Diagram 8. Market value of Banks common shares*
during the 2nd quarter of 2015

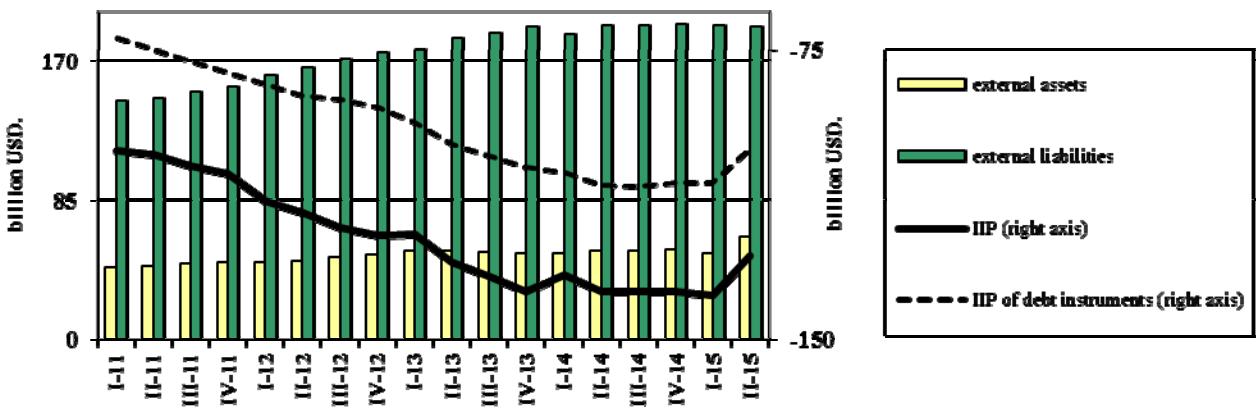

* Source: KASE website

Investment position of Other sectors

As dynamics show, the investment position of Other sectors is improving, taking into account change in the sector of BTA Bank (Diagram 9).

Diagram 9. IIP of Other sectors, as of the end the period

As of June 30th, 2015 investment position of Other sectors amounted to (-) 128.3 billion USD (Table 2), increasing during the reporting period by 10.2 billion USD.

External assets increased by 9.8 billion USD and amounted to 62.4 billion USD (36% of country's external assets). Predominant part of external assets is taken up by equity and investment fund shares (Diagram 10).

External liabilities of Other sectors equaled 190.7 billion USD (90% of external liabilities of Kazakhstan) and during the reporting quarter decreased by 0.4 billion USD mainly due to equity and valuation changes. The largest share of external liabilities is formed by loans from nonresidents.

* Statistical reporting data on mutual trade with the Member States of the Customs Union and declared foreign trade with the third countries. In the official data on trade, the value of imports is included in the CIF-type prices with the cost of transporting goods to the Kazakhstan border, which according to the classification of balance of payments is reflected in the "Services"

**data of customs receipt on import of vehicles for personal use, not included in the official statistics of foreign trade.

Structure of exports and imports according to official statistics data

in mln. of U.S. dollars

Name of merchandise group	H1 2014				H1 2015			
	export	%	import	%	export	%	import	%
<i>Coefficient of commodity concentration¹</i>		82,8		35,4		75,9		36,6
Live domestic animals and production of cattle breeding	67,4	0,2	355,4	1,8	49,7	0,2	254,6	1,6
Vegetable products	1 119,0	2,6	556,0	2,9	749,1	3,1	561,6	3,6
Adiposes and oil of animal or vegetable origin	29,5	0,1	76,8	0,4	27,8	0,1	92,2	0,6
Products of food industry alcohol, tobacco	181,2	0,4	985,7	5,1	163,6	0,7	810,4	5,2
Mineral products	35 013,2	82,3	1 339,2	6,9	18 282,4	74,6	1 207,8	7,8
Products of the chemical industry	1 358,7	3,2	1 842,0	9,6	1 470,0	6,0	1 575,3	10,2
Plastics and products: caoutchouc	64,7	0,2	968,1	5,0	46,7	0,2	778,2	5,0
Hide, leather, fur raw and products	7,8	0,0	55,8	0,3	14,2	0,1	42,1	0,3
Wood and products	4,9	0,0	249,3	1,3	0,4	0,0	168,5	1,1
Paper	10,3	0,0	442,3	2,3	8,9	0,0	232,7	1,5
Textiles and textile goods	65,6	0,2	592,9	3,1	42,3	0,2	439,1	2,8
Footwear, hats, umbrellas and canes	11,1	0,0	310,8	1,6	7,3	0,0	219,7	1,4
Products of stone, gypsum, cement, asbestos	14,7	0,0	476,0	2,5	8,7	0,0	334,3	2,2
Precious and semiprecious stones, precious metals	362,8	0,9	36,2	0,2	364,9	1,5	30,6	0,2
Base metals and products	3 321,0	7,8	1 940,4	10,1	2 977,9	12,2	1 993,4	12,9
Machinery, equipment, mechanisms; electrotechnical equipment	607,4	1,4	4 968,1	25,8	159,7	0,7	4 409,9	28,5
Auto, rail, air and water transports	253,7	0,6	3 007,8	15,6	96,4	0,4	1 522,9	9,8
Devices, optical and photographic appliances	15,4	0,0	528,6	2,7	18,2	0,1	395,2	2,6
Different manufactured goods	21,8	0,1	534,2	2,8	11,2	0,0	413,1	2,7
Works of art; antiques	0,0	0,0	0,5	0,0	0,0	0,0	0,4	0,0
Mixed cargo	1,0	0,0	12,6	0,1	0,1	0,0	12,8	0,1
Total	42 531,3	100,0	19 278,6	100,0	24 499,5	100,0	15 494,7	100,0

¹Coefficient of commodity concentration is calculated as the square root of the sum of squares of the ratios of export /import of certain product groups to their aggregate volume
Increase of coefficient means the growth of share of certain group of goods in total.

Analysis of price and quantity of supplies for export of certain goods

Code	Name of commodity group	January - June 2015	January - June 2015	January - June 2014	Price	Quantity	Value			
		Value (in million of US dollars)								
		n1*p1 A	n1*p0 B	n0*p0 C						
Total export		24 499,5		42 531,3			0,58

Methodological commentary to the balance of payments and the international investment position

The international accounts for an economy summarize the economic relationships between residents and nonresidents. They comprise the following¹: the balance of payments (BOP), International Investment Position (IIP), and other changes in financial assets and liabilities accounts.

The international accounts provide an integrated framework for the analysis of an economy's international economic relationships, including its international economic performance, exchange rate policy, reserves management, and external vulnerability.

Methodological commentary to the balance of payments

The balance of payments is a statement that summarizes economic transactions between residents and nonresidents during a period.

Compilation and evaluation of BOP is conducted based on the International Monetary Fund's methodology

– Balance of Payments and International Investment Position Manual (sixth edition, 2009) (BPM6) in accordance with standard accounting rules and definitions.

Main BOP compilation rules and definitions:

- recording of transactions between residents and nonresidents;
- recording of transactions according to double-entry system;
- recording of flows rather than stocks;
- valuation of transactions and transfers denominated in different currencies in a single unit of account;
- recording of transactions at the time of the change of ownership;
- recording of transactions by type and by sector.

Residents and nonresidents. Each institutional unit is a resident of one and only one economic territory with which it has the strongest connection, expressed as its center of predominant economic interest. An institutional unit is resident in an economic territory when there exists, within the economic territory, some location, dwelling, place of production or other premises on which or from which the unit engages and intends to continue engaging, either indefinitely or over a finite but long period of time, in economic activities and transactions on a significant scale.

Flows refer to economic actions and effects of events within an accounting period. International flows are recorded in the accounts as transactions or other changes in financial assets and liabilities. Flows reflect the creation, transformation, exchange, transfer, or extinction of economic value; they involve changes in the volume, composition, or value of an institutional unit's assets and liabilities.

Double-entry system

A transaction is an interaction between two institutional units that occurs by mutual agreement or through the operation of the law and involves an exchange of value or a transfer.

Each transaction involves two entries – a credit and a debit entry – for each party to the transaction. This principle ensures that the total of all credit entries and that of all debit entries for all transactions are equal, thus permitting a check on consistency of accounts for a single unit.

In the current and capital accounts, a credit denotes entries from exports, primary income receivable, transfers receivable, and disposals of nonproduced nonfinancial assets. A debit is used to record entries for imports, primary income payable, transfers payable and acquisitions of nonproduced nonfinancial assets.

In the case of transactions in financial assets and liabilities, the terms “net acquisition of financial assets” and “net incurrence of liabilities” are used. The interpretation of increase (decrease) under the credit or debit notion depends on whether the increase (decrease) refers to assets or liabilities (a debit for an asset is an increase, a debit for a liability is a decrease).

In accordance with the double-entry basis of BOP statistics, each transaction is recorded as consisting of two entries where the sum of credit entries equals the sum of debit entries.

Transactions registration time is determined according to the accrual basis. Transactions are registered at the time when economic value is created, transformed, exchanged, transferred or extinguished. The emergence of

¹ External debt is often attributed to the external sector statistics. Standard report on external debt is a structural part of the IIP, but due to its important analytical value, the external debt is usually regarded as a separate component of the external sector statistics

financial claims and liabilities is associated with the change of ownership right for any resources from one party of an international transaction to another. Such a transition can be legalized, and may involve the actual transfer of resources or establishment of control over these resources by the other party. In the case of non-obvious transition of economic ownership right, the transition is considered to occur when parties of the transaction record it in their books or accounts.

Changes in the volume of assets and liabilities that occur as a result of transactions are recorded in the BOP. The BOP transactions involve both transactions that are accompanied by actual payments and those that do not involve cash payments.

Valuation of transactions. Transactions are valued at their actual market price recorded in contracts and agreements between independent parties of the transaction.

International accounts are formed for the following sectors: the central bank, banks (deposit-taking corporations except the central bank), general government, and other sectors including other financial corporations and nonfinancial corporations, households and nonprofit institutions serving households (NPISHs). Classification and sectorization systems meet international standards.

Main BOP accounts

Standard BOP structure consists of the following accounts: the current account (the goods and services, the primary income, the secondary income), the capital account and the financial account.

The current account shows flows of goods, services, primary income, and secondary income between residents and nonresidents. The current account balance shows the difference between the sum of exports and income receivable and the sum of imports and income payable (exports and imports refer to both goods and services, while income refers to both primary and secondary income).

The current account and capital account exclude the use of a "minus" sign while showing imports of goods and services as well as primary and secondary incomes paid. At the same time, the balance of relevant accounts (goods, services, primary income and secondary income) is defined as the difference between the credit and the debit entries.

Current account:

Main components of the “**Goods**” account are export and import of goods on a balance of payments basis, net exports of goods under merchanting, nonmonetary gold.

Nonmonetary gold covers all gold other than monetary gold. In its turn, monetary gold is a financial asset that is not created by an instrument and that does not represent a claim on another entity and acts as a means of international payments and store of value for use in reserve assets.

Export and import of general merchandise on a balance of payments basis covers goods (as well as re-export), whose economic ownership is changed between a resident and a nonresident and that are not included in the following specific categories: goods under merchanting, nonmonetary gold, parts of travel, construction, and government goods and services not included elsewhere.

Re-exports are foreign goods (goods produced in other economies and previously imported) that are exported with no substantial transformation from the state in which they were previously imported.

Merchanting is defined as the purchase of goods by a resident (of the compiling economy) from a nonresident combined with the subsequent resale of the same goods to another nonresident without the goods being present in the compiling economy.

The difference between sales over purchases of goods for merchanting is shown as the item “net exports of goods under merchanting”. As a result of losses or increases in inventories, net exports of goods under merchanting may be negative in some cases.

Nonmonetary gold in the form of bullion or other forms is shown as a separate article in the goods.

Services cover the services that are performed by residents for nonresidents and vice versa. The following types of services are included in the BOP: manufacturing services on physical inputs owned by others; maintenance and repair services; transport (including postal and courier services); travel; construction; insurance and pension services; financial services; charges for the use of intellectual property not included elsewhere; telecommunications; computer and information services; other business services; personal, cultural, and recreational services; government goods and services not included elsewhere.

In accordance with the balance of payments basis, the time of recording of service entries in the international accounts is the time at which the service is delivered. The provision of services should be recorded on an accrual basis in each accounting period, i.e. they should be recorded as they are rendered. To the extent that the time of payment differs from the time of delivery, there may be trade advances (financial assets and liabilities that are extinguished as the service is provided) or trade credits (financial assets and liabilities that arise as the service is provided).

Primary income includes compensation of employees, investment income and other primary income.

Compensation of employees presents remuneration in return for the labor input to the production process contributed by an individual in an employer-employee relationship with the enterprise. In international accounts compensation of employees is recorded when the employer and the employee are resident in different economies.

Compensation of employees has three main components:

- 1) wages and salaries in cash;
- 2) wages and salaries in kind;
- 3) employers' social contributions.

Investment income is the return for providing financial assets, including dividends, reinvested earnings and interest, that is, income from direct, portfolio, other investments and reserve assets.

Dividends are distributed earnings allocated to the owners of equity for placing funds at the disposal of the corporation.

Reinvested earnings represent the direct investor's proportion, in terms of equity held, of the earnings that foreign subsidiaries and associates do not distribute as dividends. In some cases reinvested earnings can be negative, for example, when a direct investment enterprise experiences a loss or when the dividends payable in a period exceed the net income in that period. Similar to positive reinvested earnings that are treated as a capital injection in the direct investment enterprise by the direct investor, negative reinvested earnings are considered to be a withdrawal of funds from the capital.

Interest is a form of investment income that is receivable by the owners of certain kinds of financial assets namely deposits, debt securities, loans, and other accounts receivable and payable for putting the financial asset at the disposal of another institutional unit. Interest is recorded on an accrual basis, that is, interest is recorded as accruing continuously over time to the creditor on the amount outstanding.

Investment income attributable to policy-holders in insurance, standardized guarantees, and pension funds represents returns to policyholders on their claims in insurance and standardized guarantee schemes in the form of technical reserves and income payable on pension entitlements.

Other primary income includes taxes on production and imports, subsidies and rent.

Secondary income account shows current transfers between residents and nonresidents. Current transfers represent compensating entries that correspond to the provision of a good, service, financial asset or another nonproduced asset when there is no corresponding return of an item of economic value. This article covers grants, humanitarian and technical aid, government contributions to various international and intergovernmental organizations, taxes and personal transfers. Current transfers are classified according to institutional sectors making or receiving transfers. The balance on the secondary income account presents total receipts less total payments.

Capital account

Capital account covers any international transactions with nonproduced, nonfinancial assets and capital transfers between residents and nonresidents. Nonproduced, nonfinancial assets consist of natural resources, contracts, leases, licenses and marketing assets.

Capital transfers are transfers in which the ownership of an asset (other than cash or inventories) changes from one party to another or which obliges one or both parties to acquire and dispose of an asset (other than cash or inventories) or where a liability is forgiven by the creditor.

Financial account

The financial account records transactions that involve financial assets and liabilities and that take place between residents and nonresidents.

The financial account indicates the functional categories, sectors, instruments and maturities used for net international financing transactions. Flows in financial assets and liabilities in international accounts are recorded on net basis. Change in external debt as a result of the revaluation of assets and liabilities in the financial account is not recorded. Entries in the financial account can be corresponding entries to goods, services, income, capital account and other financial account entries.

In the financial account the terms "net acquisition of financial assets" and "net incurrence of liabilities" are used instead of "assets" and "liabilities". If there is an increase of assets or liabilities, it is shown with a "plus" sign; if there is a decrease in assets or liabilities, it's shown with a "minus" sign. The balance on the financial account is defined as the difference between assets and liabilities.

Financial assets consist of claims of residents on nonresidents and "gold bullion" component under monetary gold.

A claim is a financial instrument that gives rise to an economic asset, which corresponds to a balancing obligation.

In the financial account assets and liabilities are classified by their functional category by the following main components: direct investment, portfolio investment, financial derivatives and stock options for employees, other investments and reserve assets.

Direct investment is a category of cross-border investment associated with a resident in one economy having control or a significant degree of influence on the management of an enterprise that is resident in another economy (owns equity that entitles it to 10 percent or more of the voting power in the management of the direct investment enterprise). Direct investment is classified as investment by a direct investor in its direct investment enterprise, return investment by a direct investment enterprise in its own immediate or indirect direct investor, or investment between resident and nonresident fellow enterprises.

Direct investment transactions according to the type of financial instrument are divided into equity and investment fund shares, reinvestment of earnings and debt instruments.

Return investment arises when a direct investment enterprise lends funds to or acquires equity in its immediate or indirect direct investor provided it does not own equity comprising 10 percent or more of the voting power in that direct investor.

Fellow enterprises are enterprises that are under the control or influence of the same immediate or indirect investor but neither fellow enterprise controls or influences the other fellow enterprise.

Portfolio investments include transactions involving debt or equity securities other than those included in direct investment or reserve assets.

Financial derivatives and employees stock options are financial instruments that are linked to another specific (base) instrument and through which specific financial risks (interest rate and foreign exchange risk, equity and commodity price risk, credit risk, etc.) can be traded in their own right in financial markets. Derivative financial instruments are classified into forward-type contracts and options.

Other investment includes other equity, currency and deposits, loans, insurance and pension programs, standardized guarantee programs, trade credit and advances, other accounts receivable and payable, SDR allocations.

Other equity is included in other investments when it is not direct investment or reserve assets. Other equity is not in the form of securities, so it is not included in portfolio investments.

Reserve assets are external assets that are readily available to and controlled by monetary authorities for meeting the balance of payments financing needs, for intervention in exchange markets to influence the currency exchange rate and for other related purposes (such as maintaining confidence in the currency and the economy, and serving as a basis for foreign borrowing).

The imbalance in the balance of payments account is called **net errors and omissions**. Net errors and omissions are derived residually as net lending/net borrowing and can be derived from the financial account minus the same item derived from the current and capital accounts.

The balance of payments has standard and analytic presentation. The standard presentation groups international transactions with goods, services, income and financial values consistent with the SNA and other macroeconomic statistics as a result of which the balance between transactions equals zero.

The analytic presentation is a reorganization of the standard presentation of balance of payments statistics to facilitate a basic distinction between reserves and closely related items and other transactions.

Methodological commentary to the international investment position

The international investment position (IIP) is a statistical statement that shows at a point in time the value and composition of:

financial assets of residents of an economy that are claims on nonresidents and gold bullion held as reserve assets;

liabilities of residents of an economy to nonresidents.

The difference between an economy's external financial assets and liabilities is the economy's net IIP, which may be positive or negative.

IIP consists of direct investment, portfolio investment, financial derivatives and employees stock options, other investment, and reserve assets.

The values in the IIP at the end of the period result from transactions and other flows in the current and previous periods. The integrated IIP statement consists of the IIP, the financial account and the other changes in financial assets and liabilities.

Other flows are changes in the volume, value, or classification of an asset or liability that do not result from a transaction between a resident and a nonresident. Other flows cover various kinds of changes in assets and liabilities that are recognized analytically under two broad types:

- 1) other changes in the volume of assets and liabilities reflect entrances of new assets into balance sheets and exits of existing assets and liabilities from balance sheets that are not caused by interactions by mutual agreement between institutional units (i.e.transactions)
- 2) revaluations (holding gains and losses) on an asset or liability arise from changes in their prices and/or the exchange rates.

IIP is compiled on the basis of BPM6. Methodological approaches to the compilation of the IIP and BOP completely coincide.

IIP and BOP compilation practices

Statistical reports on transactions with financial assets and liabilities serve as source data for the compilation of international accounts (BOP, IIP, external debt). Reports submitted by respondents are checked and revised according to the National Bank's results of registration and notification of foreign exchange transactions involving the movement of capital, as well as information from banks and professional participants of the securities market.

Appendix VI.1

Methodological principles for assessing the volume of "shuttle" trade

A significant part of Kazakhstan's foreign trade turnover consists of the "shuttle trade" - unorganized, i.e. not getting to official customs statistics, foreign trade transactions of individuals. The National Bank of Kazakhstan estimates such transactions to include them in the articles of the trade balance as an adjustment on coverage.

The total estimate of the goods imported/exported by individuals with the purpose of subsequent resale is calculated as the product of the number of "shuttle traders" and the average cost of their imported and exported goods.

One of the main sources for determination the proportion of individuals who are engaged in "shuttle" business and the list of countries with which the "shuttle" trade is most active were the results of the border survey of passengers conducted in October, 2000 together with customs authorities at major border auto transitions, railway checkpoints, and international airports. The survey allowed establishing the proportion of the exiting and the entering by region and trip purposes as well as the average amount of personal expenses for travel and the amount spent by "shuttle traders" for commercial purposes. In addition, to determine the average value of goods per one "shuttle trader", data from the Customs Committee on the goods transported by individuals and declared under the simplified procedure were used.

Shuttle imports calculations from the non-CIS countries:

Baseline information is the data of the Border Service of the National Security Committee of the Republic of Kazakhstan on the number of individuals crossing the border of the country. According to the survey results, the Kazakh "shuttle" raids are carried out mainly in China and Turkey.

Across the non-CIS countries the average value of goods purchased by "shuttle traders" is estimated to be \$5000 since the goods imported by individuals in excess of that amount are subject to declaration and recognized in customs statistics. The share of "shuttle traders" is set on average at 60% of those leaving the Republic of Kazakhstan for the purpose of tourism and private trips to China and Turkey and 20% - for the non-CIS countries. Contiguity of borders suggests more intensive trade, so calculations on China also include the nonresidents who exit the country to enter Kazakhstan with a private purpose and as a tourist.

Shuttle imports calculations from the CIS countries:

Based on the results of the survey, average expenditure on goods imported by a "shuttle trader" from the Russian Federation, Kyrgyzstan and Uzbekistan is determined, which is then multiplied by the estimated number of "shuttle traders". The average expenditure on goods imported by "shuttle traders" from the Russian Federation was set at \$1500, from Kyrgyzstan and Uzbekistan - \$500. The number of shuttle traders is defined as the proportion of the number crossing the border with a private purpose (according to the Russian Federal Border Service and PS RK NSC): 25% of those crossing the border from the Russian Federation, 20% from Kyrgyzstan and 30% from Uzbekistan. At the same time only the exiting residents are taken into account for Russia, whereas for Kyrgyzstan and Uzbekistan – the exiting residents and also nonresidents exiting these republics.

Shuttle exports calculations to the CIS countries:

Given that goods for resale by individuals are not exported to other countries, the calculations of shuttle exports are made only for the CIS countries.

The survey allowed obtaining quantitative ratios for determining the shuttle traders exporting goods to the CIS countries - 15% from the number of residents traveling to the Russian Federation for private purposes and 30% - from the number of residents traveling to

Uzbekistan, as well as nonresidents exiting these countries. Average expenditure was determined from the results of the survey and amounted to \$500 for export to Russia and \$350 to Uzbekistan.

Appendix VI.2

Methodological principles for estimating the value of imports in FOB prices and the calculation of transport costs during exports and imports of goods

Data generated on the basis of customs freight declarations of official statistics on the import of goods reflect the value of the goods at the customs border of Kazakhstan. That is, during an import of goods from countries that do not have a common border with Kazakhstan, the customs value of imported good in addition to the value of the good at the customs border of the importer (FOB-type valuation) includes the cost of insurance and freight transportation to the border of Kazakhstan (CIF-type valuation).

In the balance of payments the values of exports and imports of goods are recorded in the FOB-type prices (loading goods at the expense of the buyer) at the customs border of the seller of the goods, while the costs of insurance and freight transportation are reflected in the relevant articles of the balance of international services. Therefore, in order to accurately reflect the data in the balance of payments, a correction to the classification is introduced in the customs statistics data on import of goods - the costs of insurance and transportation, which are already included in the import of international services in the "insurance services" and "freight transportation" articles, are deducted from the CIF-type value of imports.

The sources for determining the share of the cost on insurance and freight transportation in the cost of imported goods are specialized surveys of exporters and importers which are held by the National Bank on an annual basis. On the basis of the survey results for 2002-2004. ("Questionnaire survey of enterprises on the costs of transportation and insurance during exports and imports of goods" as a form of statistical report was introduced in 2002) average estimated coefficients for recalculation of imports of goods from CIF prices to FOB prices and calculation of freight services by mode of transport were obtained. The coefficients were estimated across border countries and other countries.

In order to obtain comparable analytically significant amount of data on trade in goods and services, as well as to ensure the formation of the balance of services by expanded classification (introduced by the International Monetary Fund in 2000), new estimated coefficients derived in 2004 were applied to the balance of payments data starting with 2000.

According to the results of specialized surveys subsequent revisions of estimated coefficients will be made if the survey data differs significantly from the average of the coefficients (for example, when new methods and routes of freight transportation appear). During revisions of the coefficients the principle of averaging data for periods that are characterized by the changes will be retained.

Appendix VI.3

Methodological principles for estimating exports and imports of international services under the "Travel"

In accordance with the methodology of the balance of payments, the article "Travel" covers primarily the goods and services that are acquired in this country by visitors (non-residents in Kazakhstan, residents abroad) if their term of stay does not exceed one year. The amount recorded in the balance of payments under this article represents estimation of cost of expenses of visitors on acquisition of goods and services in the country of residence. In this group doesn't include the transportation of passengers in international traffic (ticket price) which are accounted for in the article "Services: Passenger".

Exports/imports of services under the "Travel" are calculated as the product of the average expenditure on a single trip and the number of the exiting/the entering.

The average expenditure per travel is defined by survey of individuals crossing the border of Kazakhstan by country of destination/arrival and trip purposes (work, tourism, private).

The Border Service of Kazakhstan National Security Committee and the Federal Border Service of the Russian Federation data provide the initial information on the number of the exiting/the entering by citizenship, purpose of travel and countries.

These guidelines for the calculation of the article "Travel" are applied from the 1st quarter of 2001.

Appendix VI.4

Methodological principles for estimating "Workers` remittances"

In according to methodology of the balance of payments "Workers` remittances" consider the transfers of the labor migrants staying outside their own country over a year, i.e. being residents of the host country.

"Workers` remittances" article of the balance of payments of Kazakhstan is formed according to the banking statistics data on international money transfers of individuals by their residency, sender/recipient country and purposes of transfer. At the same time bank statements do not contain information about the origin of these funds and the senders' citizenship. Taking into account the flow of funds as payments for purchased goods and services (considering country distribution of workers` remittances) in the reporting data on non-repayable money transfers, estimates of the share of non-repayable workers` remittances of individuals in the total amount of personal transfers that are classified by senders as non-repayable are conducted. Thus, under this article the cross-border non-repayable transfers of individuals according to bank statistics data taking into account the estimates of the National Bank.

Methodological approaches to this estimation were developed from the results of December, 2010 with participation of the Kazakhstan banks of anonymous inspection of physical persons senders of money transfers.

Based on results of the survey averaged coefficients to estimate the share of non-repayable transfers were obtained, where the coefficients were estimated by countries, by direction (from Kazakhstan/to Kazakhstan) and by methods (using a bank account and through international money transfer systems).

These coefficients are used to estimate the Workers` remittances, starting with the 1st quarter of 2009. At the same time transactions carried out through international money transfer systems are taken into account in this article.

Appendix VI.5

Principles of calculating the real effective exchange rate index

The real effective exchange rate index (REER) is a weighted average change of tenge exchange rate against the currency basket of main trade partners of Kazakhstan corrected for changes in prices.

An increase\decrease in the index shows tenge appreciation\depreciation against the basket of currencies of countries with which Kazakhstan engages in trade transactions, so with other things being equal, means that domestic producers have more\less competitive advantages in the domestic and in the external markets.

Algorithm for calculating the index of the real effective exchange rate (REER)

Initial parameters:

1. Weights of Kazakhstan trade partners in total trade turnover. Countries that belong to the currency basket account for about 90% of the total registered trade turnover.
2. Nominal exchange rates of the countries - trade partners in relation to dollar.
3. Changes in CPI of countries - trade partners.
4. Exchange rate of KZT/USD.
5. Changes in Kazakhstan's CPI.
6. Selection of the basic period in relation to which the index is calculated.

Data transformation

- Normalization of trade partner weights, calculation of country share w_i in the total commodity trade turnover:
The current year weights are calculated by means of averaging given country weight in group total commodity trade turnover for three preceding years.

$$w_{ji} = \frac{t_{j(i-1)} + t_{j(i-2)} + t_{j(i-3)}}{T_{i-1} + T_{i-2} + T_{i-3}}$$

where

- w_{ji} - country weight in the total commodity trade turnover for the group for the current year
 $T_{i-1\dots i-3}$ - commodity turnover for the group of countries for three preceding years
 $t_{j(i-1)}\dots t_{j(i-3)}$ - country commodity turnover for three preceding years

Thus to calculate REER index for 1999 we use the weights computed based on trade statistics data for 1996-1998; for 2000 – 1997-1999 and so on. For 1995-1997 since there is no data for the three preceding periods average weights for 1995-1997 are used.

- Transformation of CPI to the base period
- Calculation of tenge cross exchange rate in terms of trade partner currency units - S_i^T for every reporting period:

Tenge cross exchange rate = Foreign currency exchange rate to US dollar / Tenge exchange rate to US dollar

Calculation of the real effective exchange rate index (REER)

- I. Calculation of tenge exchange rate change for a reporting period relatively to the base period:

$$\Delta S_i = S_i^T / S_i^0,$$

where

ΔS_i - tenge exchange rate change for the reporting period denominated in foreign currency units (reverse

S_i^T - quotation);
 S_i^0 - tenge exchange rate for the reporting period;
 S_i^0 - tenge exchange rate for the base period.

II. Calculation of the nominal effective exchange rate index (NEER)

$$NEER = 100 * \Pi_i (\Delta S_i)^{w_i}$$

where

w_i - weight of country i in the total commodity trade turnover;

Π_i - multiplication of tenge exchange rate against trade partner countries currencies change indices taking into account normalized weight of a country in the total country group commodity trade turnover.

III. Calculation of the real effective exchange rate index (REER)

$$REER = 100 * \Pi_i (\Delta S_i * (P_i^d / P_i^f))^w$$

where

P_i^f - price level in i country – trade partner of Kazakhstan;

P_i^d - price level in Kazakhstan;

Π_i - multiplication of tenge exchange rate against trade partner countries' currencies change indices, corrected for relative prices taking into account normalized weight of a country in the total country group commodity trade turnover.

The use of three-year period for calculation of trade partner country weights in the county's trade turnover is the most optimal option. This approach allows smoothing influence of different short-term factors on commodity trade flows. At the same time the risk of using old structure of commodity trade in the weighting scheme is negligible. Changes in the geographical distribution of commodity trade flows are actualized as soon as new data for a given period is received. The National Bank of Kazakhstan updates trade weights annually.

For analytical purposes, The National Bank of Kazakhstan also calculates real effective exchange rate index on the basis of weights excluding external trade transactions with oil and gas condensate. As the influence of exchange rate fluctuations on the competitive advantage of the exporters and importers of these commodities is negligible (in this case the most important factor is the change in world prices for fuel commodities), this index can provide the most adequate estimation of exchange rate fluctuations' influence on the volumes and structure of external trade.

Appendix VI.6

Principles for calculating net inflows/outflows of capital by the private sector

Net inflows/outflows of capital include all transactions by the private sector registered in the financial account of the balance of payments, as well as errors and omissions.

The private sector includes all residents except for the Government of the Republic of Kazakhstan and the National Bank of Kazakhstan ("General government" and "Central bank" sectors in the balance of payments).

For the purposes of this table, net acquisition of assets recorded in the financial account of the balance of payments is shown with the opposite sign: an increase in assets is presented with a "minus" sign, whereas a decrease - with a "plus" sign. Accordingly, aggregates (Net inflows/outflows of capital, Banks, Other sectors, Transactions of the Government sector, Financial account (excluding reserve assets)) are also presented with the opposite sign to that used in the balance of payments. Thus, outflow of capital includes transactions related to an increase in external assets or a decrease in external liabilities in this

table. Inflow of capital is provided by an increase in external liabilities or a decrease in external assets.

External assets include investments of residents in foreign stocks or debt securities, loans and credits granted by residents to nonresidents, receivables of residents from nonresidents, foreign currency belonging to residents, residents' accounts abroad and other assets.

External liabilities include investments of nonresidents in domestic stocks or debt securities, loans and credits granted by nonresidents to residents, payables of residents to nonresidents, nonresidents' accounts in domestic banks and other liabilities.

Assuming that the errors and omissions in the balance of payments are mainly formed by the non-bank private sector transactions, this item is included in the calculation of net inflows/outflows of capital from other sectors.

External Debt of the Republic of Kazakhstan as of June 30, 2015

From the 1st quarter of 2013, Kazakhstan's balance of payments is compiled in accordance with the sixth edition of "Balance of Payments and International Investment Position Manual" (BPM6). The main methodological changes are stated in the press release of the National Bank No.25, which is available on the following webpage: <http://www.nationalbank.kz/?docid=199&switch=english>.

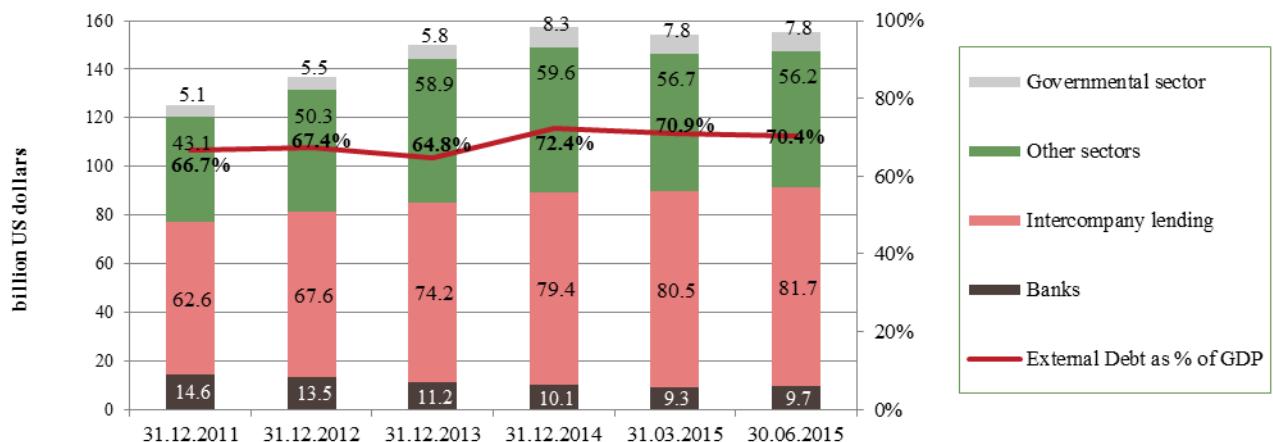

External debt is the outstanding amount of the actual and unconditional liabilities of the country's residents to nonresidents at a particular point in time, which requires payment(s) of principal and/or interest. Meanwhile, the intercompany lending bears a certain level of conditionality, which is expressed by the dependence of terms of principal and/or interest payments on the results of operating activities of the borrowers. In the context of external debt management, systemic risks of the state related to intercompany lending are estimated to be low since the creditor-direct investor shares the risk of insolvency of the borrower through their participation in the management of its activities. In this regard, the intercompany lending, including obligations of Kazakhstan's banks and enterprises to foreign direct investors, foreign direct investment enterprises, as well as foreign fellow enterprises, is presented separately in the structure of the external debt.

The analytical tables on External Debt are listed in attachment to this note.

1. External debt position of the Republic of Kazakhstan

On 30th of June 2015 the external debt of the Republic of Kazakhstan amounted to 155.2 billion US dollars (hereinafter – billion dollars), of which 9.7 billion dollars - the external debt of the “Banks”¹ and 7.8 billion dollars – the external debt of the “Governmental sector”². The rest is attributable to the debt of ‘Other sectors’³ owed to affiliated nonresidents (the so-called “intercompany lending” – 81.7 billion dollars) and unaffiliated nonresidents (56.2 billion dollars) (Figure1).

Figure 1. Dynamics of external debt

During the 2nd quarter of 2015⁴ the external debt increased by 0.9 billion dollars mainly as a result of transactions (+0.4 billion dollars) and price and other changes (+0.5 billion dollars). The liabilities of governmental sector shrank by 82 million dollars, while those of “Banks” sector increased by 0.4 billion dollars and of «Other sectors» to nonaffiliated nonresidents decreased by

¹ Including second-tier banks and JSC "Development Bank of Kazakhstan"

² Including "General government" (Government of the Republic of Kazakhstan) and the "Central Bank" (National Bank of Kazakhstan)

³ Including non-bank financial corporations, nonfinancial corporations, and households and nonprofit institutions serving households

⁴ Here and below, unless otherwise stated, are reflected changes in the structure of external debt, occurred in the 2nd quarter of 2015

0.5 billion dollars, which was fully counteracted by growth of intercompany lending liabilities by 1.2 billion dollars (Table 1).

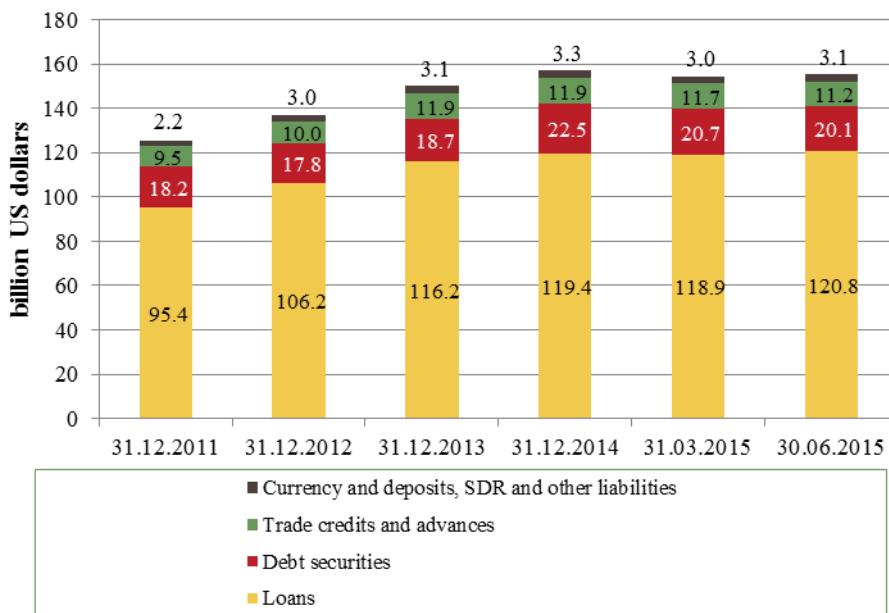

Table 1. External Debt: reconciliation of positions and flows

(million dollars)

	'Position at the 31.03.2015	Changes in Position in the 2 quarter of 2015 due to:			'Position at the 30.06.2015
		transactions	revaluation ⁵	other changes in volume ⁶	
External Debt	154 321.0	410.3	701.6	-194.0	155 238.9
General Government	7 079.0	-106.9	5.8	0.0	6 977.9
Central Bank	760.3	12.1	6.8	0.0	779.2
Banks	9 290.0	41.5	332.1	-2.	9 661.1
Other Sectors	56 694.0	-565.7	404.3	-366.4	56 166.2
Direct investment: Intercompany lending	80 497.7	1 029.3	-47.4	174.9	81 654.4

A breakdown of external debt by financial instruments has not undergone significant changes: it is still dominated by loans received from nonresidents (78%) and debt securities owned by nonresidents (13%) (Figure 2).

Figure 2. Instrumental breakdown of external debt

Short-term external debt on original maturity basis decreased by 88.6 billion dollars and its share slightly decreased to 5.3% of external debt compared with the previous period.

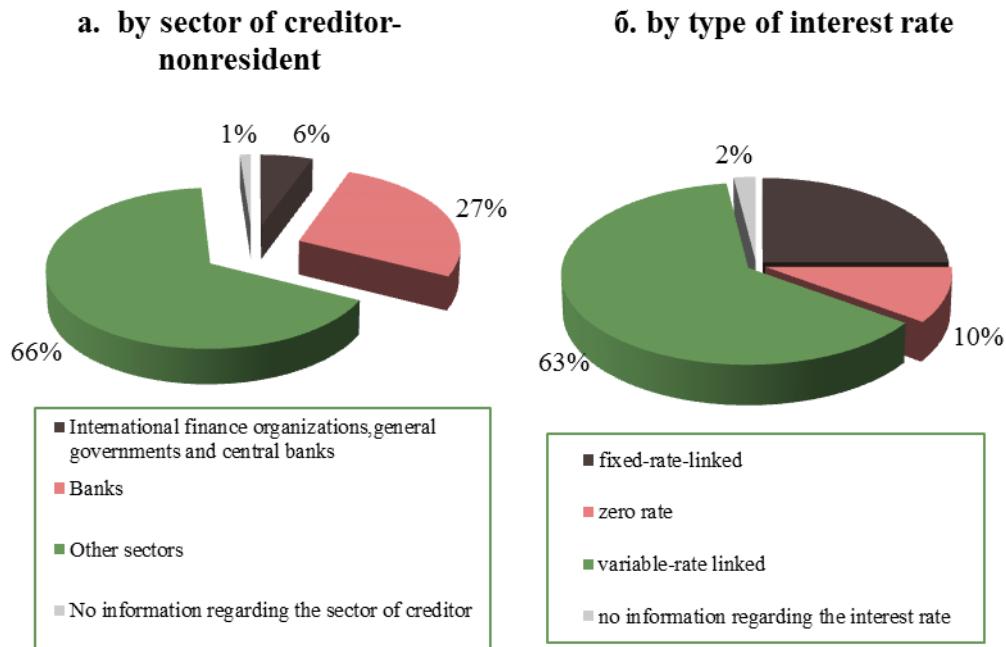

The main creditors of Republic of Kazakhstan are foreign banks, whose claims to residents equal 41.6 billion dollars and other sectors of nonresidents (103.2 billion dollars), including intercompany lending - 81.7 billion dollars. Governmental sector's liabilities are mainly to international financial organizations (5.2 billion dollars) (Figure 3).

⁵ as a result of fluctuations in price and exchange rate of financial instruments.

⁶ changes in the value of assets that are neither to transactions nor revaluation, including those due to cancellation and write-offs, economic appearance and disappearance of assets, reclassifications, changes in financial volume arising from entities changing their economy of residence, as well as corrections of errors of previous periods

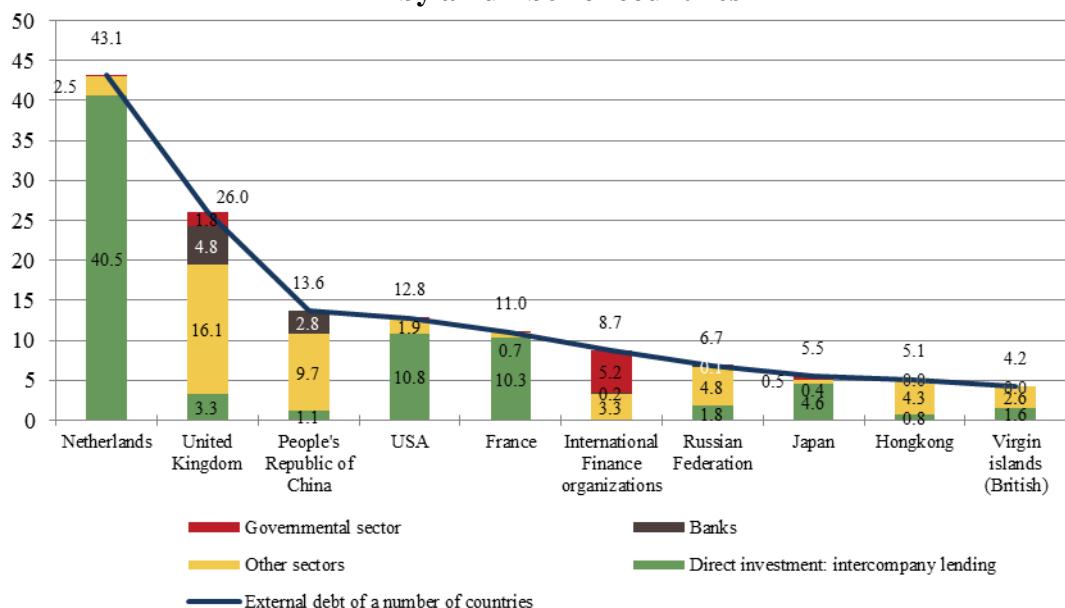

In the breakdown by types of interest payment, the prevailing share of external debt of the Republic of Kazakhstan (97.8 billion dollars) has a variable-linked interest rate, which creates risk related to the servicing of external debt in response to changing market conditions (Figure 3).

Figure 3. External debt with the breakdown by sector of creditor and by type of interest rate

Regarding countries-creditors of Kazakhstan (Figure 4), almost a third of the external debt is to the Netherlands, primarily as intercompany lending; 17% - to Great Britain and 9% - to China, mainly to non-affiliates. The Netherlands and the United Kingdom are financial centers where transits of capital from different countries takes place, which decreases the country concentration risk of external debt of Kazakhstan.

Figure 4. The external debt with the breakdown by sectors of debtors by a number of countries

2. Main changes in the structure of external debt

The decline in external debt of the **Government of the Republic of Kazakhstan** (Table 2) by 101 million dollars was mainly due to the excess of purchases of government Eurobonds by residents over sales to nonresidents.

Table 1: External governmental sector debt and debt guaranteed by the government

	31.12.10	31.12.11	31.12.12	31.12.13	31.12.14	31.03.15	(million dollars) 30.06.15
Governmental sector debt:	4 800.9	5 050.7	5 474.0	5 764.3	8 286.2	7 839.3	7 757.1
Government of the Republic of Kazakhstan	3 800.3	4 487.4	4 855.1	5 217.6	7 332.5	7 079.0	6 977.9
The National Bank of Kazakhstan	1 000.6	563.3	618.9	546.7	953.7	760.3	779.2
External debt guaranteed by the government (of "Other sectors")	310.5	442.0	470.6	495.2	416.3	530.0	518.6
Total	5 111.4	5 492.7	5 944.6	6 259.4	8 702.5	8 369.3	8 275.7

The external debt of the **National Bank of Kazakhstan** slightly changed, increasing by 19 million dollars as a result of rise in Special Drawing Rights allocated by the International Monetary Fund and in correspondent accounts and deposits of nonresidents in the National Bank of Kazakhstan.

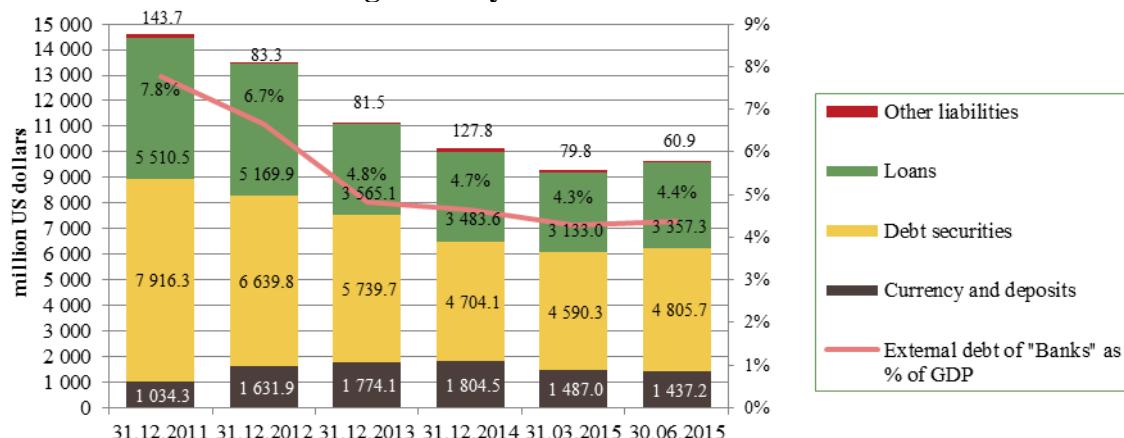

It should be noted that the liabilities of the "Central Bank" are mainly represented by SDR (62.6% as of June 30, 2015).

External debt guaranteed by the government during the reporting period decreased by 11.4 million dollars. Currently, the government guarantees are given to the funds involved in the implementation of projects for the reconstruction of electric networks of Kazakhstan, as well as the development of transport infrastructure.

The share of governmental sector external debt and external debt guaranteed by the government in the structure of external debt on the reporting date slightly declined relative to the end of 1st quarter of 2015 and amounted to 5.3%.

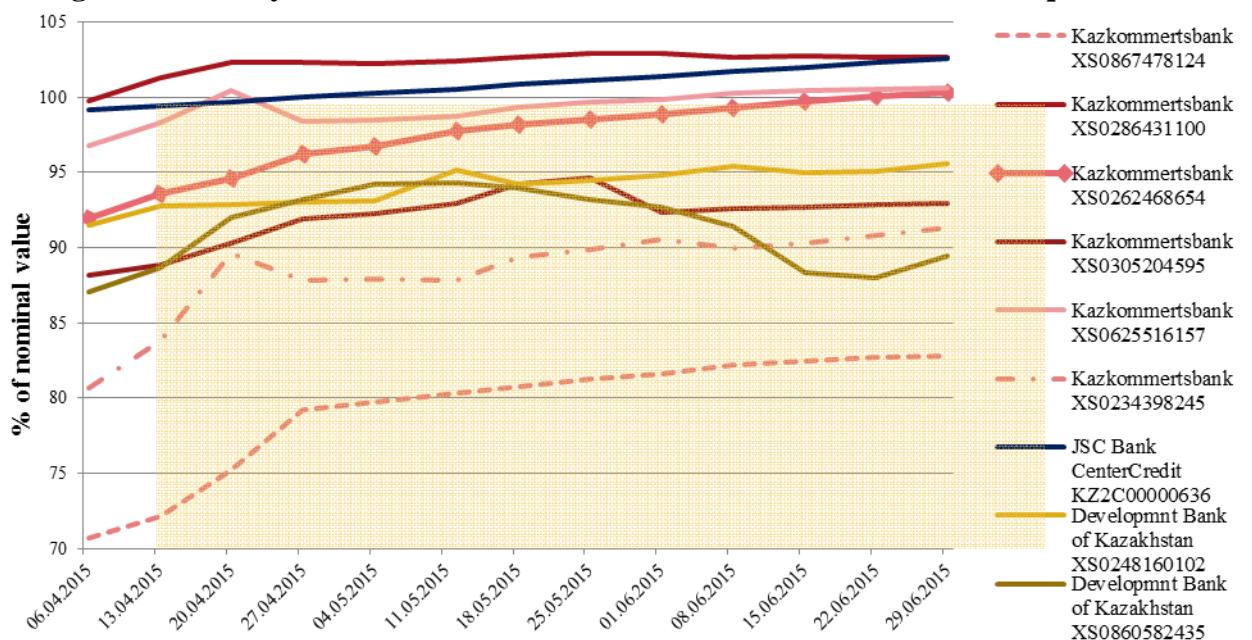

During the reporting period the growth of external debt of "**Banks**" (Figure 5) by 0.4 billion dollars was caused by price changes in debt securities of a number of banks.

Figure 5. Dynamics of external debt of "Banks"

In comparison with the 1st quarter of 2015 most of the debt securities of the Kazkommertsbank gained in value due to the completion of the merger with the BTA Bank (Figure 6).

Figure 6. Price dynamics of debt securities of a number of banks in the 2 quarter of 2015

Cumulative external liabilities of “Other sectors” (to affiliated and nonaffiliated nonresidents) during the reporting period increased by 0.6 billion dollars, primarily due to attraction of loans from affiliated nonresidents. At the same time, the debt of “Other sectors” to nonaffiliated nonresidents declined by 0.5 billion dollars mainly as a result of repayment of liabilities by public sector corporations, as well as the redemption of international coupon bonds of JSC “National Atomic Company “Kazatomprom” with the face value of 0.5 billion dollars. Table 3 presents the external debt of “Other sectors” with the breakdown by relationship (whether the debt is created between affiliated parties) between lenders-nonresidents and borrowers-residents.

Table 3: Direct investment: intercompany lending

(million dollars)

	31.12.2012	31.12.2013	31.12.2014	31.03.2015	30.06.2015	Change for the 2 quarter 2015
Debt liabilities of Kazakhstani enterprises to non-affiliated nonresidents	50 311.0	58 928.7	59 630.3	56 694.0	56 166.2	- 527.8
as % of external debt	37%	39%	38%	37%	36%	
Debt liabilities to affiliated enterprises (intercompany lending)	67 608.3	74 179.5	79 386.3	80 497.7	81 654.4	1 156.7
as % of external debt	49%	49%	50%	52%	53%	
1. Debt liabilities of Kazakhstani enterprises of direct investment to direct investors	63 632.6	69 896.5	72 642.2	73 628.1	74 783.3	1 155.1
<i>Including the liabilities of branches of foreign companies, working on the territory of Republic of Kazakhstan</i>	51 069.6	56 611.1	59 176.6	60 034.8	60 951.6	916.8

3. Debt liabilities of Kazakhstani enterprises to fellow enterprises	546.5	890.7	5 341.6	5 654.2	5 655.3	1.1

3. Absolute and relative parameters of the external debt

The rise in value of gross domestic product (GDP in dollar terms) led to a moderate improvement in relative parameters of external debt linked to GDP: however, the reduction in parameter exports of goods and services (EGS) for the year (which includes the parameters of EGS from the 3rd quarter of 2014 to the 2nd quarter of 2015) resulted in worsening of relative parameters of external debt to EGS. On 30th of June 2015, the ratio of external debt to GDP was 70.4% against 70.9% at the end of the 1st quarter of 2015, and the ratio of external debt to EGS was 225.4% compared to 202.9%, respectively.

However, as was noted above, the intercompany lending bears a certain degree of conditionality, which is expressed by the dependence of terms of principal and/or interest payments on the results of operating activities of the borrowers. Accordingly, international practice is accustomed to exclude intercompany lending in the analysis of absolute and relative parameters of the external debt of the country.

The ratio of payments of interest on foreign long-term and short-term debt to exports of goods and services during the period is viewed as a measure of the solvency of the country. This ratio indicates the conditions for attracting external funds and, therefore, the debt burden (Table 4).

Table 4: Relative parameters of the external debt of the Republic of Kazakhstan

	Coefficients, %						
	External debt/GDP	External debt/GDP (excluding intercompany lending)	External debt/EGS	External debt/EGS (excluding intercompany lending)	Long-term external debt service / EGS	Long-term external debt service / EGS (excluding intercompany lending)	Interest payments /EGS
31.12.2010	79.9	44.5	180.5	100.7	38.8	23.9	7.2
31.12.2011	66.7	33.4	140.0	70.1	33.1	18.8	5.3
31.12.2012	67.4	34.1	149.2	75.5	34.8	20.6	5.6
31.12.2013	64.8	32.8	165.1	83.5	35.1	21.3	5.5
31.12.2014	72.4	35.9	181.3	89.8	36.6	20.6	5.9
31.03.2015	70.9	33.9	202.9	97.1	72.6	51.1	9.7
30.06.2015	70.4	33.4	225.4	106.8	57.4	37.5	8.6

Greater reduction in the country's external debt assets accompanied with the slight increase in external debt liabilities led to an increase of the net debt of Republic of Kazakhstan by 3.4 billion dollars, reaching 32.0 billion dollars or 14% of GDP (compared to 28.5 billion dollars or 13% of GDP at the end of the 1st quarter of 2015).

The “Governmental sector” still preserves the position of a net creditor in relation to the rest of the world in the amount of 70.0 billion dollars. However, as a result of change in status of BTA Bank and its further reclassification to “Other sectors”, the “Banks” sector moved from the position of a net creditor (8.6 billion dollars at the end of the 1st quarter of 2015) to the position of a net borrower (-1.5 billion dollars at the end of the 2nd quarter 2015). Meanwhile, the “Other sectors” considerably improved their position (-109.6 billion dollars at the end of the 1st quarter 2015, -100 billion dollars at the end of the 2nd quarter 2015).

Debt service schedule includes projected repayments of the outstanding external debt as at 31.03.2015 (column "External debt") and the interest rate charged over the period subject to the projected repayments (row "Interest").

"Banks" - liabilities by correspondent and current accounts, call deposits of nonresidents and arrears

The article "Other sectors" does not include Intercompany lending, which is presented as an independent article in the External Debt structure

The sector "Banks" includes commercial banks and the Development Bank of Kazakhstan.

The part of the external debt with no detailed repayment information is included in the "no information" column:

- the sector "Banks" includes other liabilities with no repayment information;
- generally, the "Other sectors" and "Direct investment: Intercompany lending" include information on trade credit liabilities of residents to nonresidents and liabilities of foreign subsidiaries based in Kazakhstan.

* Public Sector External Debt covers:

- liabilities of the General Government, Monetary Authorities,
- covers liabilities those entities in the banking and other sectors that are public corporations, i.e. non-financial or financial corporations which are subject to control by government and monetary authorities. Control is established (directly or indirectly) through ownership of more than half of the voting shares or otherwise controlling more than half of the shareholder voting power;
- publicly guaranteed external debt.

**According to the article 8 of the Law of Republic of Kazakhstan "On governmental statistics" information which allows directly or indirectly determine the respondent is considered confidential and is allowed to be published only if there is an agreement from the respondent. As a result the sector "Banks" is united with sector "Other sectors".

Correspondence between indicators of the External Debt and items of the International Investment Position of the Republic of Kazakhstan

Indicators of the table “External debt of the Republic Kazakhstan: standard presentation”	Coverage of debt	Specificity of accounting	Corresponding indicators of the table “International investment position of the Republic of Kazakhstan: standard presentation”
General Government			
Debt securities. Long-term, short-term.	Debt to nonresidents of the Ministry of Finance of Kazakhstan on securities (MEKKAM, MEOKAM, MEUKAM and other) and on Eurobonds issued by the Government of Kazakhstan, as of the reporting date.	Debt is converted to dollar equivalent at the market exchange rate ¹ as of the reporting date. For valuation of the debt, market value of securities is used. The sum of purchase of securities on primary and secondary markets by nonresidents, the sum of buybacks on the secondary market by residents, repayments by the issuer and exchange rate changes are included in the calculation of debt.	Portfolio investment. Liabilities. Debt securities. General Government. Long-term, short-term.
Loans. From the IMF, other long-term, short-term.
